

Exemption for Export of Technical Data in Response to DoD Requests for Proposal

Q. What part of the ITAR will the new exemption come under?

A. Sub-section 125.4

Q. Can U.S. industry proceed directly to manufacturing under this exemption (i.e., without a license)?

A. No. The limitation in 125.1(b) precludes using the exemption for foreign production purposes and continues to apply to the new exemption. Once a contract has been let, a license (in the case of a build-to-print effort) or manufacturing license agreement must be in place before any additional defense service may take place.
