SUBJECT: Revised Security Cooperation Drawdown Handbook – TRANSFORMATION TASK FORCE DELIVERABLE

The Foreign Assistance Act (FAA) authorizes the President of the United States to direct transfers of on-hand, U.S. Department of Defense stocks to respond to unforeseen emergencies or requirements. DoD policy for managing and executing these transfers, known as “Drawdowns,” is provided in DoD 5105.38-M, “Security Assistance Management Manual,” (SAMM), paragraph C11.4.

While the SAMM Drawdown guidance provides the high-level information needed by the Security Assistance community as a whole, it does not contain the level of detail needed within DSCA to manage these transfers. The DSCA Drawdown Handbook provides these additional details. This Handbook was first created in December 2000 and has now been updated—the new version is attached for your information and use in managing our Drawdown programs.

This Handbook represents the combined efforts of the Policy and Plans Division of P3 and the Operations and Administration Division of Business Operations/Comptroller, and may be accessed on our DSCA Internet Website at: http://www.dsca.osd.mil/publications.htm. I believe this handbook will prove invaluable for those of you involved in the Drawdown process.

TOM H. WALTERS, JR.
LIEUTENANT GENERAL, USAF
DIRECTOR

Attachment
As stated
PREFACE

Drawdowns are different from normal Security Assistance procedures, and very important tools for furthering U.S. foreign policy objectives. Key players in the drawdown process are the Country Program/Financial Directors, as well as other personnel within DSCA.

A drawdown is one of the very unique times when the Commander-in-Chief, placing full trust and confidence in you, empowers you to effect a change in international relations. Although the drawdown of Department of Defense articles, services and training is generally coordinated through existing Security Assistance channels using the basic policies and guidelines already in-place, usually, time is of the essence. Drawdowns do not occur that often and as a result we fully recognize that you need help in wading through this sometimes-mysterious world.

This handbook is a guide for you and other Defense Security Cooperation Agency (DSCA) personnel who become involved in the planning and execution of drawdowns. It is not intended to serve as a regulation, and consequently should not be construed as one. That said, this guide builds upon two earlier editions and contains the wisdom of some of the best and brightest professionals in the Security Cooperation Community.

U.S. Army Regulation 725-50 (AR 725-50)
C1. CHAPTER 1

PURPOSE

C1.1. THE PURPOSE OF DRAWDOWNS

Drawdowns allow the President of the United States to respond to unforeseen emergencies and other requirements without having to first seek additional legislative authority or budgetary appropriations. These include peacekeeping operations, narcotics control, international disaster assistance, antiterrorism assistance, nonproliferation assistance, migration and refugee assistance, and prisoner of war/missing in action (POW/MIA) efforts in Cambodia, Laos, and Vietnam. From a legal perspective, a drawdown is the execution of statutory authority that permits the disposition of United States property or services. On an exceptional basis, specific legislation may authorize the procurement of articles and services provided by drawdown.

C1.2. THE PURPOSE OF THIS HANDBOOK

C1.2.1. This handbook is a general guide for action-level personnel in planning and executing drawdowns of DoD defense articles in stock and defense services. There is no one directive that governs Presidential Determinations (PD). However, the following DoD regulations and manuals should be used in addition to this handbook:

C1.2.1.1. DoD 4141-R, Materiel Management Regulation, Chapter 4. --Asset Management

C1.2.1.3. DoD Financial Management Regulation (DoDFMR) 7000.14R, Volume 15, Chapter 7 (Pricing). The electronic version can be found at URL: http://www.dtic.mil/comptroller/fmr

C1.2.2. The drawdown of DoD articles and services is generally coordinated and executed through existing Security Assistance channels using the basic policies and guidelines already in place. Each Action Officer should therefore refer to appropriate legislation, policy guidance, and procedures already in existence in planning and executing drawdowns. However, the basic steps in a drawdown are the same and are identified in subsequent chapters.

C1.2.3. This handbook highlights those elements of drawdown actions that differ from regular Security Assistance procedures.

C1.2.4. The most critical element in understanding drawdowns is that there is normally NO budget authority (no funding) associated with drawdowns. U.S. Government (USG) agencies
providing articles and services under drawdowns must absorb the impact associated with the
drawdowns within their budgets. Except for transportation and related services where new
contracts would cost less than providing such services with DoD assets, no new procurement is
authorized and no new money may be placed on existing contracts. As a matter of law, only
articles and services already in DoD stocks may be drawn down. Recent exceptions to this rule
occurred in the case of drawdowns for Afghanistan [Afghanistan Freedom Support Act (AFSA)
P.L. 107-327] and Iraq [Iraq Liberation Act of 1998 (P.L. 105-338) (the “Act”)], where
drawdown of funds was authorized by law.

C1.2.5. A basic premise to keep in mind is that there are NO standard drawdowns. All
drawdowns will vary with degree of urgency, political pressure, time-lines, and degree to which
the Services can support the proposed drawdown without adverse operational or financial
impact.
C2. CHAPTER 2

OVERVIEW OF DRAWDOWN TYPES

C2.1. DEFINITION

For lack of any official terminology, drawdowns can best be characterized as Emergency or Non-Emergency drawdowns.

C2.2. EMERGENCY DRAWDOWNS

The traditional drawdown is normally precipitated by an emergency in a foreign country or region. An example was the devastation caused by hurricane Mitch in the Americas a number of years ago.

C2.2.1. In emergency drawdowns, the Department of Defense (DoD), U. S. Department of State (DoS), and National Security Council (NSC) coordinate the United States Government (USG) response with implementing agencies and organizations. This ad hoc interagency process determines which existing statutory authority applies to the situation and identifies which articles and services should be provided.

C2.2.2. Potential contributing executive agencies (e.g. Department of Defense, U.S. Department of the Treasury (DoT), U. S. Department of Justice (DoJ)) and the Military Services furnish Valuation and Availability (V&A) data indicating the estimated value of the articles and services proposed for the drawdown. The V&As are retained by the Military Services furnishing the data and the DSCA Country Program Director (CPD) maintains copies of the data for the applicable drawdown.

C2.2.3. The resulting estimate of articles/services and the scope of support forms the basis for the subsequent Presidential Determination (PD) authorizing a specific dollar value for the drawdown authority, which may be executed in the situation.

C2.2.4. The time-line for starting execution of emergency drawdowns may be as short as 24-48 hours, but more commonly takes 1-2 weeks.

C2.3. NON-EMERGENCY DRAWDOWNS

Drawdowns may be authorized in non-emergency situations to support mid- to long-term foreign policy initiatives, rather than to respond to emergencies. The procedure for starting and executing a non-emergency drawdown is similar to the procedure for an emergency drawdown, with the following variations.
C2.3.1. In non-emergency situations, the value of the drawdown is set forth in existing or special legislative authority and further stated in the PD. As requirements are refined, a major focus of some of these drawdown efforts has been to “use up the authority” (i.e., execute the full value of the PD).

C2.3.2. The time-line to determine requirements for such drawdowns is often extended from one to six months before an Execute Order (EXORD) is issued. The EXORD is the operational requirement document for the Services. Delivery of articles and services may take an extended period of time. Articles and services to be provided tend to be more long-term oriented, e.g. allocation and refurbishment of end items.

C2.3.3. Such drawdowns “end” when the termination date established in the EXORD is reached. Accordingly, there is likely to be a mid-course financial reconciliation of “actual” versus “projected” costs. If the value of the PD has not yet been exhausted, new items may be potentially added to the drawdown via a new EXORD.

C2.3.4. **Drawdowns -- Recent Trends.** In recent years, the drawdown of DoD articles and services has increased. From 1980 to 1992, 25 drawdowns were executed for an aggregate PD value of $652.02 M. Between 1993 and May 2004, there were 61 drawdowns with total PD value of $2.3B. Recent drawdowns have been used to build up the recipient's long-term military capability (Bosnia, Jordan, Mexico, Colombia, etc.) as well as to respond to emergent military (e.g., Sierra Leone) or humanitarian (e.g., Venezuela, Southern Africa) crises. A list of DoD drawdowns and the record values began in 1963 and has continued through May 2004. Appendix 1 provides a complete list of these drawdowns and their values.
C3. CHAPTER 3

STATUTORY AUTHORITY

C3.1. GENERAL

Drawdowns are authorized either under the Foreign Assistance Act of 1961 as amended (FAA), or under special legislative provisions.

C3.2. STANDING DRAWDOWN AUTHORITIES

Statutes in force for the drawdowns of USG articles and services are listed in Table C3.T1 below. This replicates the information that may be found in table C11.T5 of the Security Assistance Management Manual (SAMM).

C3.2.1. Table C3.T1 summarizes the drawdown authorities and their differences.

</tbody>
</table>
| FAA, Section 552(c)(2) [22 U.S.C. 2348a(c)(2)] (reference (b) SAMM) | Peacekeeping Operations:  
- Authorizes drawdown if the President determines that an unforeseen emergency requires the immediate provision of commodities and services of any USG agency to countries and international organizations to support peacekeeping operations.  
- Congress must be notified before the President signs the PD.  
- The aggregate value of drawdowns directed under FAA, section 552(c)(2) (reference (b)) may not exceed $25M per fiscal year. United Nations support may be limited to $3 million per fiscal year per operation; Public Law 106-113, section 724 (22 U.S.C. 287b and 287c(2)) (reference (ck)). |
| FAA, Section 503 (reference (b) SAMM) | General authority to furnish Military Assistance under the FAA. |
| FAA, Section 505 (reference (b) SAMM) | Conditions of eligibility for Military Assistance under the FAA. |
| FAA, Section 652 [22 U.S.C. 2411] (reference (b) SAMM) | Congressional Notification required before the President can direct drawdowns or exercise other specified special authorities under the FAA. |
| Special Legislative Authorities | Congress may create special legislation for specific programs or purposes. There is no annual limit on the amount of special authorities that Congress may authorize. Special authorities give the President the legislative authority to provide assistance, but it is a Presidential decision whether to use that authority. Legislation for special authorities may provide for broader drawdown assistance, including authorization to contract for articles, services, and education and training that are NOT on hand. |
| Cargo Preference Act of 1954 (reference (bd) SAMM) | All drawdowns items transferred by ocean carriers must follow U.S. cargo preference requirements. Recipient countries must use U.S. flag vessels unless the Maritime Administration (MARAD) has issued a non-availability waiver. MARAD assists in monitoring these statutes. The MILDEPs must consider cargo preference requirements when considering transportations options for drawdowns. The responsible office at MARAD is:  
U.S. Department of Transportation  
Maritime Administration  
Office of Cargo Preference  
400 Seventh St. SW  
Washington, DC 20590 |

C3.3. **SIGNIFICANT ADDITIONAL LEGISLATIVE AUTHORITIES THAT RELATE TO DRAWDOWNS**

C3.3.1. **Enhanced End Use Monitoring (EUM).** Enhanced EUM is required for sensitive defense articles, services, and technologies; defense articles provided under the provision of FAA, section 505; and technology transfers made within sensitive political situations. For sensitive articles and/or services, EXORDs may contain specialized notes requiring greater physical security and accountability contingent on the principal of trust with verification. In addition to routine observations, EUM of these items may require a compliance visit to the host government by a Defense Security Cooperation Agency (DSCA)-led team.
CHAPTER 4
GOVERNING POLICY AND PROCEDURES

C4. POLICY DOCUMENTATION

There is no single document that provides all policy guidance and procedures for drawdowns. Unless otherwise noted, normal Security Assistance procedures apply.

C4.2. POLICIES AND GUIDELINES

As we have executed drawdowns in recent years, the following unique drawdown policies and guidelines have evolved:

C4.2.1. Equipment to be provided must be physically on hand (excess or non-excess).

C4.2.2. Except for transportation, no new contracts (including placing orders against existing contracts) are authorized. Equipment, spares, and other items must already be in DoD stocks. Supplies or services under existing DoD contracts may be used for drawdown purposes if the use is within the scope of the PD, and funds have been previously obligated. Inventory Control Points (ICPs) must process requisitions with “Fill or Kill” advice codes (2J, 31, 32, etc. as appropriate). On an exceptional basis, legislation authorizes the procurement of articles and services provided by drawdown. New contracts for transportation and related services may be incurred for a drawdown if the cost to acquire such transportation and services is less than the cost to use DoD assets.

C4.2.3. The Services must reimburse Defense Working Capital Funds (DWCFs) for all materiel and services provided. These costs should be accounted for under the current year operations and maintenance (O&M) budget. Refer to FMR Volume 12, Chapter 23, Section 2305. Memo at Appendix 2 has been incorporated and cited as a reference in Volume 12, Chapter 23, Section 2302 for the policy from the Office of the Secretary of Defense (Comptroller). (Examples of DWCF can be found at: http://www.dod.mil/comptroller/icenter/dwcf/dhintro.htm.)

C4.2.4. Fuel drawdowns are handled in the same way as DWCF materials. The Defense Energy Support Center (DESC) under Defense Logistics Agency (DLA) manages fuel contracts for all the Services. As a rule, the Services do not hold large inventories of fuel. DESC’s bulk fuel contracts allow the Services to procure fuel on an “as-needed,” “just-in-time” basis. As with any other commodity, the Services can utilize O&M or Working Capital Fund (WCF) obligational authority to fund, via Military Inter-departmental Purchase Request (DD Form 448, MIPR), fuel drawdowns supplied from DESC existing contracts. Use of this funding can impact obligational authority for normal Services operations; therefore such issues should be carefully coordinated with the Services and reported to the Office of Under Secretary of Defense Comptroller (OUSD(C)) for inclusion in subsequent budget requests. See DoD 7000.14-R,
Volume 11b, Chapter 55, for more information on inventory and supply management operations as they pertain to Presidential directed drawdowns. As with any other type of drawdown commodity, new contracts are not permitted. Consequently, the type of fuel available for drawdowns will be limited to those available through DESC’s existing bulk fuels contracts at the time of drawdown. For example, the FY99 counternarcotics drawdown made available marine diesel F-76 and jet fuel JP-8. Special coordination is required for the transportation, delivery, storage, accountability and distribution of fuel (see Chapter 9 Transportation Planning for more details), generally resulting in a Memorandum of Understanding (MOU) signed by the receiving nation and U.S. Embassy outlining the necessary details.

C4.2.5. Under normal circumstances, the Service tasked with providing specific equipment must fund and ensure the transportation of that equipment to its final destination in accordance with the EXORD. U.S. Transportation Command (USTRANSCOM) is reimbursed for air/sealift provided from the Service tasked with providing the equipment. (See Appendix 2 for more details.)

C4.2.6. Airlift and sealift can be provided using Military Air (MILAIR)/Military Sea (MILSEA) or appropriate time-charter contracts if the scope of existing contracts covers the proposed use (such as time-charter or multiple air mission agreements). Drawdown statutes provide for the supply of commercial transportation and related services acquired by contract for the purposes of the specific drawdown, if the cost to acquire such commercial transportation and related services is less than the cost to the USG of providing such services from existing agency assets.

C4.2.7. Where possible, complete support packages are normally provided for any major end items, to include training for both operation and maintenance of the major end item.

C4.2.8. Basic Security Assistance channels/procedures are used for provision of articles and services.

C4.2.9. Valuation (pricing) process for drawdowns does NOT include Security Assistance surcharges (See Chapter 7).

C4.2.10. Requisitioning of material and spare parts for shipment normally provides authority for use of Force Activity Designator (FAD) levels and priority. Spare parts requisitions are processed on a “Fill or Kill” basis.

C4.2.11. Military/civilian pay and per diem may be included when computing the cost of drawdown services, but only for those funded civilian pay and travel and per diem costs for military and civilian personnel performing an approved support role that is exclusively devoted to the drawdown effort may be included when computing the value of the drawdown services. Examples include personnel tasked to provide specific DoD services for a drawdown, e.g. training teams, personnel conducting equipment repair or refurbishment, personnel deployed in support of the drawdown, quality assurance teams (QAT).
C4.2.12. Unless authorized otherwise, materiel must be provided in condition code “B”, or Full Mission Capable (FMC) condition, or -10/-20 standards or better.

C4.2.12.1. U.S. Army Regulation 725-50 (AR 725-50), Table C-38 defines condition code “B - serviceable (issuable with qualification)” as: “new, used, repaired or reconditioned, materiel which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy.”

C4.2.12.2. FMC as defined by the U.S. Army (DA PAM 750-35 Glossary & AR 700-138), defines equipment and systems that are safe, and have all mission-essential subsystems installed and operating as designated by applicable U.S. Army regulation. This is applicable to all Services. A full mission capable vehicle or system has no faults that are listed in the “not Fully Mission Capable (FMC) ready of” column of the -10/-20 TM PMCS tables that apply to the vehicle/system or its subsystem required by AR 700-138. The terms “ready/available” and “full mission capable” refer to the same status, i.e., equipment is on hand and able to perform its combat missions without endangering the lives of crew or operators.

C4.2.12.3. -10/-20 standards as defined by the US Army (applicable to all services) (DA PAM 750-35 Glossary & AR 750-1, Para 3-1 & 4-6): The following conditions are true of FMC equipment:

C4.2.12.3.1. All faults are identified using the "items to check" column of the applicable TM -10-series and TM –20 series PMCS table.

C4.2.12.3.1.1. Corrective actions that are authorized to be accomplished at unit level, and for which required parts are available, are completed.

C4.2.12.3.1.2. Required parts are requisitioned for faults that require corrective actions.

C4.2.12.3.1.3. Corrective actions that are authorized to be accomplished at a maintenance level above the unit are on a valid direct support maintenance request.

C4.2.12.3.2. Equipment services are performed within the scheduled service interval.

C4.2.12.3.3. All current urgent and limited urgent modification work orders are applied.

C4.2.12.3.4. All authorized basic issue items and components of end item are present and serviceable or on valid requisition.

C4.2.13. Services cannot place a hold/reserve/fence equipment nor spares before the release of DSCA’s Execute Order.
C4.3. **INTERNAL DSCA RESPONSIBILITIES**

The following outlines the internal DSCA responsibilities with regard to drawdowns.

**C4.3.1. Country Program Director (CPD) Responsibilities.**

C4.3.1.1. Coordinates with the DoS, NSC, DoD offices (including regional/policy offices, Joint Staff and Unified Commands, GC and Comptroller, and the Services), the Security Assistance Organization (SAO), and other government entities to develop drawdown packages, ensuring legal, policy, and logistical requirements are met.

C4.3.1.2. Coordinates draft PD package with GC, OPS-ADMIN, HA/MA and P3-Policy.

C4.3.1.3. Works with the Services to identify available resources for drawdowns, and serves as the “honest broker” to ensure an equitable distribution of requirements amongst the Services to the maximum extent practicable.

C4.3.1.4. Serves as focal point for his/her particular drawdown and coordinates drawdown documentation as required.

C4.3.1.5. Drafts and ensures release of EXORDs granting legal authority and direction for drawdowns to proceed.

C4.3.1.6. Monitors the progress of deliveries and the provision of services under drawdown and ensures that drawdown authority levels are appropriately distributed to accomplish the mission by reviewing monthly Military Department generated delivery reports.

C4.3.1.7. Maintains the “working” file for the drawdown. Upon closure of the drawdown, the official file will be transitioned to and maintained by OPS-ADMIN.

**C4.3.2. OPS-ADMIN Responsibilities**

C4.3.2.1. Reviews/coordinates draft PD package.

C4.3.2.2. Reviews EXORDs.

C4.3.2.3. Maintains Drawdown Summary spreadsheet on the DSCA P: drive.

C4.3.2.4. Receives monthly delivery reports from the Military Departments for review by OPS-ADMIN and the CPD.

C4.3.2.5. Monitors deliveries to ensure timely reporting by the Services into the DSCA 1000 system.

C4.3.2.6. Identifies any variances between delivered articles and services and the DSCA 1000 system and seeks explanations from the Military Departments as required.
C4.3.2.7. Ensures that overall drawdown ceilings are not exceeded.

C4.3.2.8. Maintains information and databases and tracks authorizations and costs reported by services via the 1000 system and PC-based files.

C4.3.2.9. Prepares annual and adhoc reports to Congress on provision of assistance under drawdown.

C4.3.2.10. Maintains and stores the DSCA historical files for all drawdowns.

C4.3.2.11. Serves as central POC for delivery and reporting issues on drawdowns.

C4.3.3. **P3-Policy Responsibilities**

C4.3.3.1. Provides general policy guidance regarding drawdowns --- this includes revising/updating the DSCA Drawdown Handbook with additional guidance (e.g., samples of various EXORDs, etc.).

C4.3.3.2. Provides updates to the drawdown section in the Security Assistance Management Manual (SAMM).

C4.3.3.4. Serves as central POC for general questions on drawdowns.

C4.3.3.5. Reviews/coordinates on draft PD packages.

C4.3.3.6. Coordinates with Joint Staff J4 to obtain Project Codes and/or Force Activity Designator (FAD) increases, and termination messages for drawdowns.

C4.3.3.7. Reviews EXORDs to ensure compliance with Security Assistance policy.

C4.3.3.8. Reviews/coordinates on reports or notifications to Congress.

C4.3.3.9. Reviews/coordinates on responses to Congressional inquiries on drawdowns.

C4.3.4. **General Counsel Responsibilities**

C4.3.4.1. Provides general counsel and advice regarding drawdowns.

C4.3.4.2. Reviews/coordinates on updates to the drawdown section in the Security Assistance Management Manual (SAMM).

C4.3.4.3. Reviews/coordinates on updates to the DSCA Drawdown Handbook.

C4.3.4.4. Serves as central POC for legal issues on drawdowns.
C4.3.4.5. Reviews/coordinates on draft PD packages.

C4.3.4.6. Reviews EXORDs to ensure compliance with the statutory authority.

C4.3.4.7. Reviews/coordinates on reports or notifications to Congress.

C4.3.4.8. Reviews/coordinates on responses to Congressional inquiries on drawdowns.

C4.3.5. Legislative and Public Affairs

C4.3.5.1. Reviews/coordinates on reports or notifications to Congress.

C4.3.5.2. Fields Congressional inquiries on drawdowns.
C5. CHAPTER 5

OVERVIEW OF THE DRAWDOWN PROCESS

C5.1. GENERAL

While no two drawdowns are identical, the following events/steps reflect the significant actions that take place in planning and executing a DoD drawdown. (See slides at Appendix 3).

C5.2. INITIATING CRISIS/POLICY SITUATION

Generally a military/humanitarian crisis occurs or another foreign policy interest is identified in which the drawdown of defense articles/services is an option. The following actions are taken in the interagency process:

C5.2.1 Preliminary identification of potential USG contributions to the situation

C5.2.2 Coordination to determine which foreign policy authorities are appropriate to the situation ((Foreign Military Financing (FMF), Peacekeeping Operations (PKO), Humanitarian Assistance (HA), Drawdown, etc.)).

C5.3. DRAWDOWN PACKAGE DEVELOPMENT

If the Interagency recommends a “drawdown” option for a specific situation, the DSCA has the DoD lead in developing the requirements, costs, and the execution plan of a potential drawdown in conjunction with the Joint Staff, OSD, U.S. Department of State, NSC and the Services. Developing a realistic list of which articles and services are available for drawdown occurs in two parallel processes: an internal DoD process and an interagency process—for which careful and thorough coordination is vital. (See Drawdown Process Charts at Appendix 3.)

C5.3.1. The Interagency process develops supporting documents to notify Congress of the drawdown and prepares the PD for the President’s signature.

C5.3.2. In the DoD internal process, the Services estimate the value of the articles and services requested to be provided and assess the potential impact on operational readiness and O&M budget

C5.3.3. Interagency Staffing. (Concurrent with DoD V&A development):

C5.3.3.1. The State Department develops its Congressional notification package on the proposed drawdown with DoD input.
C5.3.3.2. Interagency representatives, working through DoS, often consult informally with Congressional staffers in a “pre-notification consultation” to prepare for Congressional approval of the drawdown.

C5.3.3.3. The Congressional notification package is submitted to the NSC for Presidential review and approval.

C5.3.3.4. Congress is formally notified of the drawdown.

C5.3.3.5. State Department prepares a Memorandum of Justification and drafts the PD for the Drawdown (with DoD input) and submits it to the NSC/White House.

C5.3.3.6. After the required Congressional Notification, the President signs the PD.

C5.3.4. The DoD Internal Process

C5.3.4.1. Where Service(s) and DoD drawdown is considered an option, DSCA tasks the appropriate Service(s) and/or agencies to provide V&A data for defense articles/services identified in the interagency process. In order to expedite the V&A process, DSCA in coordination with Implementing Agencies and organizations (e.g., CECOM, DLA, etc.,) must provide as much information as possible for the required items such as National Stock Number (NSN), DoD Ammunition Codes (DODAC), quantities, sizes, etc. The Services shall not define drawdown requirements. Historically, MILDEF International Logistics Control Offices (ILCO) have been provided with under-defined requirements (e.g. Boots, uniforms, 81mm ammo) and have been expected to cross reference to NSN’s/DODACs etc. This is often impossible due to the large variety of similar materiel available in inventory.

C5.3.4.2. V&A data are provided to DSCA with appropriate readiness or Operations & Maintenance (O&M) impact statements. The Services sometimes provide readiness impact statements to DSCA through the Joint Staff.

C5.3.4.3. DSCA coordinates readiness impacts with Joint Staff (if not previously provided through the Joint Staff).

C5.3.4.4. When the Interagency questions the Services’ statements of impact on readiness or operations and maintenance, the issue is elevated up the OSD chain for Deputy Secretary of Defense or Secretary of Defense resolution.

C5.3.4.5. The impact of the drawdown on the Services’ Operational Readiness (OR) and/or O&M budget is “balanced” among the Services as much as possible until general agreement is reached on the DoD package. This is one of the key roles the DSCA CPD must perform in his/her role as “honest broker,” in attempting to “balance the load” among Services.

C5.3.5. Synchronizing Pd Development

The Services normally determine which articles and services are available to support the drawdown during the V&A process. Since the V&A process happens simultaneously with the interagency development of the drawdown package, there is a continual review/update of the
drawdown “package.” The Interagency determines what is appropriate to provide based on what is actually available (either physically available or can be provided with acceptable Operational Readiness (OR) impact). The final PD should reflect what DoD can, in fact, provide and becomes the base reference for execution of the drawdown.

C5.4. DRAWDOWN EXECUTION

C5.4.1. Before executing a drawdown, the DSCA CPD must have:

C5.4.1.1. A signed copy of the PD.

C5.4.1.2. The State Department’s assurance of eligibility (Section 503).

C5.4.1.3. The State Department’s assurance that an end-use agreement exists for all drawdown recipients (Section 505).

C5.4.1.4. The State Department’s assurance that human rights issues do not preclude delivery of drawdown related equipment and/or services.

C5.4.2. After obtaining the requisite coordination, the DSCA CPD issues an Execute Order(s) authorizing DoD execution of the drawdown.

C5.4.3. Subsequently, the executing Services/DoD Agencies issue their own Execute Order(s) to initiate action to provide the directed equipment or services. This process normally includes:

C5.4.3.1. Providing required maintenance to bring the equipment to the transfer standard (i.e., condition code “B”, or FMC), if accomplished with organic assets or within the scope of existing funded contracts.

C5.4.3.2. Providing spare parts/tools.

C5.4.3.3. Providing adequate operational and maintenance training if required/applicable and

C5.4.3.4. Packing, crating and handling (PC&H) and transportation.

C5.4.4. Equipment is staged, consolidated, and containerized at selected sites if required/applicable.

C5.4.5. USTRANSCOM, Military Surface Deployment and Distribution Command (SDDC), and Military Sealift Command (MSC) coordinate Air or Sea transportation and designate Aerial Ports of Embarkation (APOE) or Water Ports of Embarkation (WPOE).

C5.4.6. Shipment is undertaken in one or more iterations as required.
C5.4.7. The DSCA/OSD/Joint Staff monitor the execution of the drawdown and make adjustments as required.

C5.4.8. While the drawdown is being executed, DSCA and the Services shall perform continuous financial reconciliation to ensure all cost elements are reported in a timely manner. Refer to Chapters 10 and 11 for additional information on this process.

C5.4.9. The DSCA provides formal reports to Congress on what articles and services were provided for the drawdown.

C5.4.10. Depending on the nature of the situation, the drawdown process can take as little as 24-48 hours to as much as 2-10 months before the first deliveries begin.

C5.5. **TERMINATION OF DRAWDOWN**

C5.5.1. Unless otherwise directed by the DSCA CPD, a termination date, not to exceed 18 months from date of Execute Order issuance, will be stated in the Execution Order message.

C5.5.2. The DSCA CPD releases a termination message for closure of the drawdown when all articles and services have been delivered and/or the termination date in the EXORD is reached. (See example Appendix 6).

C5.5.3. Upon receipt of the termination message, OPS-ADMIN shall prepare and release the official notification to Congress (See example Appendix 6).

C5.6. **OUT-OF-CHANNEL STARTS - INVALID EQUIPMENT LISTS**

C5.6.1. On occasion, individual program advocates within the State Department, OSD, or the NSC policy offices may start developing a concept for a drawdown and prepare a “wish list” of articles and services without full Interagency coordination. The Joint Staff, the Services, and the DSCA CPD may first hear about the proposed drawdown action when a “strawman” is furnished in an Interagency meeting to make “decisions” on the proposed drawdown.

C5.6.2. In such situations, DoD cannot validate at that time whether any of the proposed defense articles and services is available; what, if any, operational impact may come from providing the proposed equipment; or what the associated costs may be. Depending on the level, forum, and associated urgency at which the drawdown proposal is presented, DoD representatives should seek to have the package validated before any decisions are made on the composition of a proposed drawdown.

C5.6.3. Anytime personnel learn that any policy offices are considering a drawdown, it is critically important to get this action into DSCA and Joint Staff channels. Once a “strawman” package has been placed before senior policymakers, it is difficult to make changes. A proper
V&A/OR review must be conducted, even if on an abbreviated time-line, before a drawdown package is presented formally in the Interagency process. It is critical that DoD has the opportunity to ensure that it can support whatever is being developed before a drawdown is formally proposed and reviewed in the Interagency forum.
C6. CHAPTER 6

DRAWDOWN SCOPE AND ELIGIBILITY

C6.1. GENERAL

The documents below, in the order given, provide guidance in determining which types of defense articles and services are authorized to be provided under a specific drawdown.

C6.2. STATUTORY AUTHORITY

The legal authorities invoked for a drawdown (Section 506(a)(1), 506(a)(2), 552(c)(2), or special legislation) may include dollar ceilings, sources of articles and services (e.g. DoD or USG), drawdown recipients, etc.

C6.3. PRESIDENTIAL DETERMINATION (PD)

The PD is the official document authorizing a drawdown execution. The Department of Defense is not authorized to initiate provision of services or requisition/deliver equipment until the PD is signed. The DSCA CPD must have a signed copy of the PD before releasing the EXORD. The PD is normally a one-page document that states the recipients for the drawdown, cites appropriate statutory authority, and gives a general description of the types of defense articles/services to be provided along with the purpose for which the articles and services are to be provided. The PD also states a dollar ceiling for the drawdown. The PD number from the authorizing document shall be cited in all EXORDs and other correspondence relative to drawdowns. Copies of recent PD’s can be found on the World Wide Web at the Federal Register document research page, http://www.access.gpo.gov/su_docs/aces/aces140.html. (See Appendix 4 for an example).

C6.4. PRESIDENTIAL DETERMINATION (PD) STAFFING SUPPORT PAPERS

The State Department and the NSC normally develop a series of memos as part of the PD development package. These documents provide additional clarification of the intended purpose and scope of the drawdown and usually provide an initial list of the equipment/services originally planned to be provided under the drawdown. These documents are normally staffed with DoD (OSD, Joint Staff and DSCA) representatives before completion. The “Memorandum of Justification” is essential to the DoD in deciding what does and does not fit within the scope of an individual drawdown. (See the sample Memorandum of Justification at Appendix 4).
C6.5. **RECIPIENT ELIGIBILITY**

The proposed recipients for drawdown may be countries or entities that previously were not eligible for receipt of US defense articles and services under the Foreign Assistance Act (FAA) or the Arms Export Control Act. As DoD proceeds with its development of a potential drawdown package, close coordination is required with the State Department to ensure that the appropriate FAA Section 503 and determinations of eligibility have been completed. In addition, an FAA Section 505 agreement must also be signed by the recipient country/entity. In the past, PD’s for drawdowns have been signed prior to completion of the eligibility agreements or the 505 agreements, but delivery could not be executed until these requirements are met. The DSCA EXORD for the drawdown must not be issued until the PD is signed, and actual delivery cannot be made until the entire eligibility legal structure is in place (FAA, Section 503/FAA, Section 505 agreement).
C7. CHAPTER 7

DEVELOPMENT OF A DRAWDOWN PACKAGE

C7.1. GENERAL

As noted earlier, there is no “standard” drawdown because the level of urgency and policy goals are different for each one. However, drawdown package development generally follows the following procedure.

C7.2. DEVELOPMENT OF A DRAWDOWN PACKAGE

C7.2.1. Request for V&A data.

C7.2.2. Review of V&A data and impact on operational readiness (OR) and/or O&M funding.

C7.2.3. Interagency review and refinement of the proposed drawdown package.

C7.2.4. Updated V&A (multiple times if necessary).

C7.2.5. Completion of the PD.

C7.3. REQUEST FOR VALUATION AND AVAILABILITY (V&A) DATA

C7.3.1. Definition. Valuation and Availability (V&A) data estimates reflect rough order magnitude data, provided for planning purposes, showing projected availabilities and estimated values for requested drawdown defense articles or services. To avoid confusion with FMS case preparation process, the term Price and Availability (P&A) data should not be used in reference to data developed for execution of a drawdown.

C7.3.2. Basic V&A Data Request. As preliminary requirements for the drawdown are identified (including NSNs, sizes, quantity etc), the DSCA CPD forwards the list(s) to the Defense Logistics Agency/ Services/ Action Officer(s)/program managers, to obtain V&A data for proposed equipment and services from their respective ILCO. The DSCA CPD should request the Services/Defense Agencies to clearly identify the value of ALL potential and allowable equipment and services associated with the drawdown. The Service Action Officer/program managers should follow the Total Package Approach (TPA) concept by specifically requesting the following information in table C7.T1:
### Table C7.T1. Basic V&A Data Request

<table>
<thead>
<tr>
<th>Step</th>
<th>Projected Costs</th>
<th>Potential/Allowable Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Drawdown value of equipment.</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>Projected value of “in-house” capability to repair/refurbish any candidate equipment to the transfer standard (i.e. condition code “B”, or -10/-20 standards, or Full Mission Capable (FMC) or better).</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Projected value for any required training associated with equipment not previously purchased or provided to the drawdown recipient.</td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>Projected value of any proposed training for the drawdown that is NOT tied to specific equipment being provided under the drawdown.</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>Projected value for any required spare parts or special tools or equipment to support the candidate equipment (normally 6-months to 1-year package).</td>
<td></td>
</tr>
<tr>
<td>6</td>
<td>Projected packing, crating, and handling (PC&amp;H) associated with shipment of the equipment and support materials</td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Projected transportation values associated with each major item or support equipment.</td>
<td></td>
</tr>
<tr>
<td>8</td>
<td>Projected value for providing any non-training DoD services under the drawdown –normally the value of civilian pay (where appropriate), travel/deployment value, per diem, etc.</td>
<td></td>
</tr>
</tbody>
</table>

C7.3.3. The time given to the Services/Defense Agencies for development of this data will be directly proportional to the urgency of the drawdown. Depending on time-sensitivity, much of the preliminary coordination for V&A data and interagency identification of requirements may be accomplished on an informal “Action Officer” level. However, informal requests and answers need to be followed up with formal taskers and formal answers as soon as possible -- particularly if it looks like items are going to be contentious. Things are generally moving fast and informal commitment to host countries or international organizations may not be “remembered.” All must remember V&A data represents a condition valid for a specific point in time in the supply system and becomes outdated the moment it is provided. Hence, changes should be expected by the time a PD is signed, 505 agreements are in place and Execute Orders are issued.
C7.3.4. “Drawdownable” versus “Non-drawdownable” Services. In responding to the DSCA request for V&A data, the Services/Defense Agencies should clearly identify what, if any, of the costs associated with the requested V&A data are NOT “drawdownable.” As noted in the Introduction and Chapter 4, no new contracting or procurement is authorized in executing a drawdown. If, due to the lack of existing “in-house” capabilities, providing any specific equipment/services (for example, repair/refurbishment, training, installation, transportation, etc.) is not possible under the drawdown authority, this needs to be identified early. If an alternate source cannot be identified for those “non-drawdownable” services, the proposed items associated with these services should not be considered as valid candidates for the drawdown. End items should not be provided unless the support (logistics/training) necessary to make the end items fully operational will be available to the drawdown recipient.

C7.3.5. Value of Drawdown Equipment/Services. Valuation of equipment and services will follow pricing policies prescribed in Chapter 7 of the DoD FMR 7000.14R, Volume 15, for defense articles issued from stock and personnel services. See C11.2.1. for more details.

C7.3.6. Operational Readiness Impact. Service V&A data should also identify if there is any operational readiness (OR) impact associated with the provision of equipment and services. If an OR impact is identified, review and comment by the Joint Staff is mandatory. See paragraph C7.2.4. for more details.

C7.4. DOD REVIEW OF V&A DATA AND OR IMPACT

C7.4.1. DSCA Initial Review. Upon receipt of the Service/Defense Agency V&A data, the responsible DSCA CPD consolidates the input from all sources to make an initial list of the articles and services reasonably available for the drawdown. This initial review should make a preliminary assessment of the completeness/validity of the provided V&A data to ensure the provided information, in fact, “answers the mail.” If necessary, DSCA personnel should request supplemental data from the appropriate Service/Defense Agency. If high visibility or priority items are indicated not to be available or reported to have significant adverse OR impact, additional discussion with the Service may be warranted to ensure that a full Service position has been coordinated. Initial DSCA review of V&A data will normally result in a “strawman” list of proposed drawdown equipment and services. This list may frequently turn into the initial allocation of taskings for the drawdown.

C7.4.2. OSD, Joint Staff, and Service Review of Proposed List. DSCA CPD will normally circulate this initial candidate list of equipment and services to the appropriate OSD International Security Affairs (ISA), International Security Policy (ISP), Special Operations Low Intensity Conflict (SOLIC), Joint Staff and Service Staffs for either informal or formal review to get general comments as DoD establishes a consensus on what equipment/services will be presented to the Interagency. Where there are contentious items, either internal to DoD, or between DoD or other departments, formal staffing is more likely to be required.

C7.4.3. Joint Staff Coordination. The Joint Staff J4 Sustainment & International Logistics Division (SILD) is the focal point for Joint Staff coordination of drawdown actions. In addition,
the Joint Staff J5 is usually represented at initial State and OSD policy discussions related to the regional crisis for which the drawdown is being considered. Getting Joint Staff on board early and keeping them up to date will save problems later.

C7.4.4. Operational Readiness (OR) Impact. When a Service or Defense Agency identifies a significant OR impact associated with the provision of any equipment or services, the DSCA turns to the Joint Staff to validate the Service analysis. The OR impact statements may be provided directly to DSCA as a part of the Service’s V&A data or provided to the Joint Staff by the Service. (NOTE: Army provides any V&A data with OR impact through the Joint Staff to DSCA). The Department of Defense excludes items or services from drawdowns for which the Services have provided significant operational impact. Where critical or mission-essential items are identified with significant OR impact, DSCA, OSD, and the Joint Staff will need to develop a formal DoD position on providing these items. In the past, one OR impact for Colombia had to be resolved at the Deputy Secretary of Defense – Secretary of the Army level. Staffing time increases appreciably when such high level decision-makers become involved.

C7.4.5. O&M Impact. Increasingly, the O&M cost of diversion of funds from other activities is being identified as the adverse OR impact for a given drawdown, rather than any specific OR impact due to loss of the equipment or provision of the services. DSCA will coordinate with OSD and the Joint Staff in reviewing Service impact statements. A possible solution may be to task another Service to provide an item/service when more than one Service is capable of meeting the requirement.

C7.5. INTERAGENCY REVIEW AND REFINEMENT OF MATERIAL AND SERVICES PROPOSED FOR DRAWDOWN

With completion of the DoD review, the proposed drawdown list is provided to the Interagency for review, this may be accomplished through formal coordination or informal review. Contentious or sensitive issues may dictate formal coordination as determined by a DSCA regional director. Based on Interagency review, the drawdown list will either be agreed to or modified.

C7.6. UPDATED V&A DATA

Based on the results of the interagency review, DSCA may go back to the Services to request additional or clarifying V&A data. Again, this may be either a formal or an informal update of the previously provided data. As a minimum, informal re-validation of V&A data for any items remaining on the proposed list after interagency review is critical.

C7.7. COMPLETION OF THE PRESIDENTIAL DETERMINATION (PD)

Based on general Interagency consensus on the proposed drawdown package, the State Department completes development of the PD for the drawdown. This includes drafting the
proposed PD itself, developing the Memorandum of Justification and any required Congressional notification package. The PD package will normally be coordinated with OSD, DSCA, and Joint Staff. If the Memorandum of Justification includes a general description of the equipment and services to be provided, the DSCA CPD should ensure that this is an accurate listing. (See sample Memorandum of Justification, Appendix 4).

C7.8. MULTIPLE V&A DATA CYCLES

Particularly with non-emergency drawdowns, there may be two or more V&A data/package development cycles. There will normally be an initial package developed and an Execute Order issued to initiate the drawdown as quickly as possible. Usually, subsequent EXORDs will be issued, as projected values for initial deliveries are reconciled. For emergency drawdowns, there will usually only be 1-3 EXORDs. As noted before, the drawdown ends when the agreed items are delivered and costs reported and termination date is reached. For non-emergency drawdowns, there is likely to be increased push for reconciliation of actual costs and supplemental requests for equipment if residual authority remains.

C7.9. PACKAGE DEVELOPMENT TIMELINES

As discussed earlier, the drawdown package development can be as short as a week or as much as 7-10 months. The timeline discussed above will be compressed or expanded to meet these requirements.
C8. CHAPTER 8
EXECUTION PLANNING

C8.1. EXECUTION PLANNING

As consensus on the drawdown is being completed, the DSCA CPD needs to start coordination for execution of the drawdown and development of the EXORD. Key planning considerations and items for coordination are: Completion/General Consensus on the Drawdown Package, Balancing of Service Taskings, Project Code, Force Activity Designator level, Maintenance/Repair Standards, Execution lead-times, Collection and Consolidation Point (CCP), Designation of a Service Lead, Assignment of Service RCNs, and Transportation Planning. Transportation planning has an entire set of considerations that are covered in more detail in Chapter 9. A sample EXORD is included at Appendix 6.

C8.2. COMPLETION OF DRAWDOWN PACKAGE

Final agreement on the drawdown package may not occur until the day the EXORD is released. If there is not complete agreement on the total package, the initial Execute Order may only provide initial tasking to start the drawdown.

C8.3. BALANCING OF SERVICE TASKINGS

As interagency agreement on what will be provided is completed, DSCA is responsible for allocating tasks to the Military Services and Defense Agencies. Where only one Service or Agency can provide a specific item or service, this is an easy allocation. Where more than one Service/Agency can provide items/services, DSCA will normally seek to “balance the load.” Balancing the load may take into consideration the current drawdown, and the drawdown taskings given to each Service/Agency during other recent or ongoing drawdowns. For common-use DLA-managed items/material, (spare parts, uniforms, system batteries, etc.), any Service or Agency can be tasked to provide the items and bear related O&M cost, even though another Service or Agency would normally be considered the “item manager.”

C8.4. PROJECT CODE

All drawdowns require a three-digit alphanumeric project code to support execution. This code will be included in all requisitions and shipping documents. DSCA P3, with the DSCA CPDs, (see Chapter C4.3.3.6), coordinates with J4 Sustainment and International Logistics Division (SILD) for assignment of the drawdown project code. This project code will be included in the EXORD(s). J4-SILD project codes are valid for a period not to exceed 1 year but can be revalidated in up to 1-year increments on a case-by-case basis until the drawdown is complete.
Whenever necessary, DSCA P3, with the DSCA CPDs can request J4 SILD to extend drawdown project code validity before its expiration date.

C8.5. **FORCE ACTIVITY DESIGNATOR (FAD) LEVEL**

DSCA P3, with the DSCA CPDs, (see Chapter C4.3.3.6), coordinates with J4 SILD to confirm or get assignment of the FAD level, which provides the appropriate priority for requisitioning and shipping of drawdown equipment. Where the drawdown is to an established FMS customer, the country’s existing FAD may be used or, if the “urgency of need” priority for the drawdown is deemed to be higher than that provided under the existing FAD, DSCA/P3 can coordinate a higher FAD level for the drawdown. Where the drawdown recipient does not have an existing FAD, DSCA/P3, with the DSCA CPD, establishes one with J4 SILD. In addition to FAD level, the drawdown EXORD will normally include guidance that the Services and DLA should fill the drawdown requisitions as if they are being filled for U.S. forces. This places the drawdown requisitions at a higher priority and eliminates the problem of non-fill of blanket order FMS requisitions below the “reorder point” from Service stocks. FAD level and “U.S. fill” guidance should be included in the EXORD.

C8.6. **MAINTENANCE/REPAIR STANDARDS**

The DSCA CPD needs to coordinate with the Services and the Interagency to confirm the required maintenance/repair standard for the equipment to be delivered. As a general rule, the minimum standard for delivery of equipment is Full Mission Capable (FMC) or applicable Service standard for special equipment (see Chapter C4.2.12). Aircraft transfer standards are normally higher and would be utilized for any assets to be transferred in flyable condition. If a standard less than FMC is proposed, all parties (Interagency, Services, and proposed recipient) must understand the political implications of delivering equipment in less than FMC condition. This is NOT recommended and DSCA, in general, does not support such delivery unless the recipient already has similar equipment and has an existing repair capability. Where the urgency of the drawdown precludes completing full pre-delivery maintenance, all parties need to understand the condition of the equipment. While some U.S. and host country policy personnel may push for quick delivery over delivery of mission capable equipment, there is a high probability that the USG will subsequently be criticized by the recipient for delivery of non-mission capable equipment — Any decision to deliver less than FMC equipment must be carefully weighed and fully coordinated with implementing agencies and organizations.

C8.7. **SPARE PARTS AND SUPPORT EQUIPMENT**

As discussed earlier, (see Chapter 4) the goal is to use the Total Package Approach (TPA) concept in delivering drawdown equipment. The drawdown package should include provisions for spare parts, special tools and necessary support equipment. Depending on the nature of the drawdown, the target for spare parts should be a one-year spare package. Delivery of end items without associated spare parts and support equipment should be considered only when the
recipient already has the same equipment and an established support capability. For example, consideration should be given to provision of adequate batteries for battery-operated equipment - particularly communications equipment. Where rechargeable batteries are provided or electrically operated equipment is provided, Action Officer’s need to ensure the U.S.-provided charging equipment or power converter systems are 220V systems, NOT 110V systems. Any consideration to deliver equipment without support equipment, spares or expendable supplies, such as batteries, again needs to be weighed against urgency of need, Service impact statements, and the political embarrassment due to our delivering equipment that ceases to operate shortly after arrival. The DSCA CPD, in coordination with other interested parties can make the ultimate decision regarding spare parts.

C8.8. EXECUTION LEAD-TIMES

C8.8.1. The triggers which authorize DoD to expend O&M funds and /or to start collection, repair and shipment of drawdown items are signature of the PD for the drawdown, State Department confirmation of Section 503 eligibility, Section 505 end-use agreements, human rights vetting, by State Department and release of the DoD EXORD. Outside pressure to commence your drawdown is likely to increase at this point. It is important to reiterate, that DoD starts drawdown only when the PD is signed and the EXORD is issued. Timeliness of deliveries is important. As the drawdown “package” has been generally discussed for some period (anywhere from 2 weeks to 2/3 months), there is frequently an interagency perspective that the drawdown material will be delivered “tomorrow” once the PD is signed. In emergency drawdown situations and/or drawdowns with DLA managed common items, the normal lead-time to collect equipment and prepare it for shipment is 3-5 weeks depending on the volume and nature of the equipment. The EXORD should take this lead-time into consideration in designating the Required Delivery Date (RDD).

C8.8.2. Maintenance/Repair Lead-Times. A second factor that affects delivery lead-time is the degree to which any repair or refurbishment is required to bring equipment to the established maintenance transfer standard (FMC or as otherwise designated). Maintenance lead-times vary (e.g., from 60-120 days), depending on the condition of the equipment and the status of “in-house” maintenance capabilities. If there are significant differences between repair lead-times for items, consideration may need to be given to multiple shipments.

C8.9. USE OF COLLECTION AND CONSOLIDATION POINT (CCP)

If the drawdown consists of a large number of major end items, spare parts and support equipment, and particularly if this equipment is to be provided from more than one Service, consideration should be given to the use of a CCP. If this is appropriate, the DSCA CPD should coordinate with the Services and DLA to agree on a site that is located to support collection and onward movement for subsequent shipment.
C8.10. **ASSIGNMENT OF RECORD CONTROL NUMBER (RCN)**

The RCN is assigned by OPS-ADMIN., in conjunction with the Country Code and Fiscal Year (FY) of a drawdown, it identifies a unique record in the DSCA 1000 System, and is also used in MILSTRIP documentation. This unique record identifies a specific commodity or specific service to be provided via the drawdown to another country or international organization. The RCN, entered in record positions 2-5 of the DSCA 1000 System, is always a four-digit code (2 alpha, 2 numeric) in which the first two digits must always be alpha characters and the third and fourth digits must always be numeric. Based on the number and types for different equipment or services tasked, each Service/Agency should be allocated adequate blocks of RCNs to support reporting within the DSCA 1000 System. For more details, see Chapter 11, section C11.6.

C8.10.1. **Same Country/Same FY.** Once a set of RCNs has been assigned for a country within a particular FY, any new drawdowns with new PD's, for that same country within that same FY, must use a new set of RCNs for each new drawdown within the same FY.

C8.10.2. **Same Country/Different FY.** Drawdowns for the same country, but in different FYs, can actually use the same RCN series, per each different FY. It does not matter when the data is actually entered into the DSCA 1000 System, provided the FYs are different for each set of data.

C8.11. **FISCAL YEAR OF A DRAWDOWN**

Drawdown executions may span more than one fiscal year. For tracking and reporting purposes, to ensure accuracy and consistency, the FY of a drawdown is the FY in which the PD is signed or the special legislative authority is invoked, regardless of when the commodities and services are actually drawn down or actually delivered, and regardless of when the data is actually entered into the DSCA 1000 System. For drawdowns being executed over several years, data should be entered against the original FY of the drawdown.
C9. CHAPTER 9
TRANSPORTATION PLANNING

C9.1. TRANSPORTATION PLANNING

As a potential drawdown is under development, early “heads up” notification to transportation offices and early coordination as requirements gel is essential to ensure that the transportation agencies (USTRANSCOM, SDDC, AMC, and MSC) can meet the desired policy requirements. When a PD and an EXORD are finally issued, external pressure will build for delivery “yesterday.” Coordination with USTRANSCOM, SDDC and MSC should be undertaken at every stage in the process.

C9.2. EXISTING AIRLIFT/SEALIFT ASSETS

Transportation planning for drawdowns is restricted to the use of DoD airlift and sealift assets unless the cost to acquire such commercial transportation and related services is less than the cost to the USG of providing such services from existing agency assets. Use of DoD military-owned/-leased aircraft or use of SDDC contracted ships under long-term time charter. SDDC has cargo ships available on long-term charter worldwide that can be used to for drawdown shipments. Long-term “open” contract arrangements for commercial aircraft are not as common, but can be used if the scope of the existing contracts meets the “no new contracting /no new procurement” restrictions. Early coordination with USTRANSCOM and SDDC may permit “contingency” planning of available shipping assets. SDDC may be able to consider the anticipated drawdown requirement as they assign transportation missions to charter ships such that the shipping is readily available when the drawdown is executed.

C9.3. PREPARATION AND TRANSPORT TO APOE/WPOE (AERIAL/WATER PORT OF EMBARKATION)

C9.3.1. Cargo Preparation. Services and Agencies providing equipment are responsible for pre-shipment inspection of all cargo to ensure it is complete and in Full Mission Capable (FMC) status, unless a lesser equipment standard has been agreed to.

C9.3.2. CONUS Origination. SDDC undertakes appropriate action to coordinate movement from origin to WPOE/APOEs. Services/Agencies, in coordination with SDDC, are responsible for movement of drawdown cargo from source depots to the designated WPOEs/APOEs. SDDC has the lead for coordination of CONUS movements. Established transportation networks and procedures will be used for this movement. Where a specific Service has been designated as lead Service for collecting cargo, it will coordinate delivery of other Service cargo to the lead Service designated consolidation point (See paragraph C9.4.3). All ammunition requirements from all Services will be coordinated through the Joint Munitions Transportation Coordinating Activity (JMTCA) at Rock Island Arsenal IL.
C9.3.3. **OCONUS Origination.** Where drawdown cargo originates from OCONUS sites, SDDC does not have the established networks for line haul service and the Combatant Command and Service component transportation offices pick up this mission.

C9.3.4. **Special Cargo Requirements.** If any cargo requires special handling (containerization, refrigeration, sensitive item security controls, ammunition compatibility, etc.), the Services and transportation offices need to identify this as early as possible to ensure appropriate funding and coordination is accomplished.

C9.4. **AIRLIFT VERSUS SEALIFT**

The decision to use airlift versus sealift will generally depend on the urgency of the drawdown, the nature of the drawdown cargo (size/volume), and the value of drawdown authority assigned.

C9.4.1. Use [https://sms.transcom.mil/sms-perl/SMSWEBStart.pl](https://sms.transcom.mil/sms-perl/SMSWEBStart.pl) to estimate airlift costs. No special permission required, just annotate airport locator code of origin and destination and type of aircraft to obtain a Special Assignment Airlift Mission (SAAM) cost estimate. If you want an AMC channel airlift cost that is possible also. Tonnage estimates (ACL) for aircraft type are in AFP 10-1403, Air Mobility Planning Factors, and table 3, Aircraft Payloads. Actually, more aircraft will be needed. The table lists 89 tons for a C-5 yet during Desert Shield/Storm, 50 tons was achieved more often. Distance requires fuel, which adds weight, which decreases tons airlifted. There is a limit on air refueling aircraft. Also, overseas over flight restrictions may increase the flight duration.

C9.4.2. Surface movement can be less expensive, but due to the limited quantities of ships on long-term charter arrangements, movement of the drawdown cargo may be restricted to availability of shipping. If the drawdown consists of large equipment or a large volume of equipment, surface movement may be the only cost effective solution. Dependent on the nature of the equipment and urgency of the drawdown, consideration may be given to splitting the shipment between airlift and surface.

C9.5. **STANDARD AIRLIFT VERSUS SPECIAL ASSIGNMENT AIRLIFT MISSION (SAAM)**

C9.5.1. **Existing Networks.** If airlift is considered for movement, the degree of urgency and the existence of (or lack of) Air Mobility Command (AMC) channel or other programmed flights to the final destination will dictate whether Special Assignment Airlift Mission (SAAM) procedures and costs need to be used for the drawdown. If an existing network is in place, DSCA and the tasked Services can take advantage and ship the drawdown cargo at minimum airlift cost on established routes. When ammunition is involved, each Service is responsible for obtaining required air clearances. As an alternative, cargo can be shipped as far forward as existing routes can support and SAAM lift used for the last portion of the delivery.
C9.5.2. **Cargo Control.** The use of SAAM flights can be more expensive but it permits maximum control of the cargo movement. When multiple cargo items being shipped for the drawdown are put in the “standard” AMC routes for delivery, close tracking is required by Service and DSCA OPS-ADMIN personnel to maintain visibility of the cargo. Cargo visibility is easily lost and confirmation of delivery can be complicated. Use of consolidated SAAM movement provides maximum cargo control. The JMTCA is the validator for ammunition SAAM requests for all Services.

C9.6. **ARRIVAL PLANNING - WPODS / APODS (WATER/AERIAL PORTS OF DEBARKATION) AND ONWARD MOVEMENT**

C9.6.1. **WPOD Reception Capabilities – Augmentation.** In selecting in-country WPOD/APODs, transportation agencies need to ensure facilities at those locations can accommodate the planned ships or aircraft (particularly in remote areas). If there are physical deficiencies at the planned reception site, but it is deemed as the only feasible site to support the mission, DoD assets may be used to augment the capability of military cargo handling equipment, personnel and units (e.g., Movement Control Teams, airfield repair assets, deployable air control assets, etc). If augmentation is required, the cost of this effort must be programmed within the overall ceilings for that drawdown. On a related note, DoD, DoS or recipient site augmentation may be required because DoD has no existing contractual arrangements in the region or site to perform reception, offload, or control services. In those cases, the possibility of obtaining contract funding from interagency sources (e.g. DoS) for WPOD/APOD reception should be explored.

C9.6.2. **Reception and Onward Movement of Cargo – U.S. or Recipient.** Early in the planning process, agreement needs to be made between the U.S. representatives, the recipient and any third party participants (UN, NATO, non-governmental agencies, etc.) regarding who will be responsible for receipt and onward movement of the cargo once it has arrived at the designated receiving waterport or airport. Generally, if the WPOD/APOD is located in the country of final destination, anticipate the cargo will be turned over to the appropriate in-country representatives. If the USG retains responsibility for onward movement, then the USG responsibility for cargo movement transitions from SDDC to the Combatant Command’s designated transportation offices.

C9.6.3. **Quality Assurance Teams (QAT).** Planning for all major deliveries (major end items, sensitive items, etc.) should include the allocation of drawdown authority (i.e., salary/per diem) for quality assurance teams to verify that all shipped cargo has been delivered and that the items and/or services are complete. Full operational checks at the delivery site may be required depending on the nature of equipment handover. As noted above, Services are responsible for ensuring that all equipment is fully operational and inspected for completeness before shipment.

C9.7. **TRANSPORTATION PLANNING ITEMS**
C9.7.1. **Transportation Account Codes (TAC).** Early Service establishment of TAC codes will facilitate USTRANSCOM, SDDC planning. For sealift movements, SDDC may require a MIPR of funds from responsible Services. Service transportation offices should establish and forward the applicable codes and be prepared to execute any required MIPRs. The TAC provides the long line of accounting to include the ESP code so the billing can be identified to the specific PD for payment and subsequent reporting to the DSCA 1000 system.

C9.7.2. **APOE/APOD and WPOE/WPOD Designation.** USTRANSCOM and/or SDDC should identify the applicable Aerial Ports of Embarkation/Debarkation (APOE/APOD) and Water Ports of Embarkation/Debarkation (WPOE/WPOD) as early as possible. Wherever possible, this information should be included in the initial Execute Order to facilitate Service execution.

C9.7.3. **DODAAC/MAPAD Designation.** DSCA and USTRANSCOM/SDDC will coordinate as early as possible to identify the applicable DoD Activity Address Code (DODAAC) and Military Assistance Program Address Directory (MAPAD) for delivery of the drawdown equipment. When the drawdown recipient has established DODAAC/MAPAD addresses, coordination should be undertaken with the SAO to select one of the existing addresses or to create new ones. When there is no existing DODAAC, MAPAD DSCA CPD/Services, will need to acquire the necessary information and build the necessary information and address codes. This should be included in the EXORD.

C9.7.4. **CCP Designation.** As previously noted, if a CCP is planned to support the drawdown, this information needs to be identified to USTRANSCOM, SDDC as early as possible and should be included in the Execute Order.

C9.7.5. **Required Delivery Dates (RDD).** Based on lead-times required established for collection and packing of material and the political urgency of delivery, the EXORD should clearly establish the Required Delivery Dates (RDD). The RDD is the date cargo should arrive at the final destination. For multiple shipment and multiple modes (air/sea) the EXORDs may identify multiple RDDs.

C9.7.6. **Transportation Control Number (TCN) / Transportation Control and Movement Document (TCMD) During Execution Phase.** During the execution phase, DSCA and Service Action Officer’s should obtain TCN and TCMD numbers for high-priority/high-visibility items to permit tracking of the cargo. This is particularly helpful in the case of airlift shipments in order to track movement of the items. USTRANSCOM has databases that can be used to locate and track most cargo with a TCN number. Before shipping ammunition items, Services will submit Advanced Transportation Control Movement Documents (ATCMD).

C9.8. **FUEL TRANSPORTATION, DELIVERY, AND DISTRIBUTION**

Prior or during execution DSCA CPDs will insure MILDEP Action Officer’s, SAO and Defense Energy Support Center (DESC) coordinate transportation, delivery and distribution of fuel. These operations require close coordination among all players due to the special nature and costs.
associated with transport, and the logistics/infrastructure considerations required for unloading, storage, and distribution monitoring. The following should be considered.

C9.8.1. Transportation. Transportation cost for fuel is a significant consideration. If fuel transport is part of the drawdown Services will have to pay, transportation costs up front with their O&M funds. Depending on the quantity of fuel and points of loading/unloading, the cost for transportation may exceed the cost of fuel itself. DESC will work with the Services to ensure the required funds are in place to contract for the fuel and to secure the tanker assets needed to transfer the fuel. DESC will determine the most efficient supply point, route, tanker/barge availability and transfer dates taking into consideration the receiving nation’s capabilities.

C9.8.2. Delivery. DESC, in conjunction with the country team, will conduct a survey of the country’s infrastructure to ensure the delivery/unloading/storage of fuel can take place efficiently. A Memorandum of Understanding (MOU) will be drafted and signed between the receiving nation and U.S. Embassy outlining the necessary details.

C9.8.3. Distribution. Due to high risk of misuse of fuel once it is delivered to the receiving nation, DSCA CPDs will work closely with in country Action Officer’s to ensure fuel end-usage monitoring procedures are in place to reduce the risk of misuse. End Use Monitoring procedures need to be agreed up-front with the receiving nation, and can be documented in a separate MOU.
DSCA H-1 June 2004

C10. CHAPTER 10

DRAWDOWN EXECUTION

C10.1. DRAWDOWN EXECUTION

DSCA is responsible for issuing the DoD Execute Order and supervising execution of the drawdown. Based on the drawdown policies/guidelines and planning considerations identified in the earlier chapters, DSCA CPD should develop the Execute Order along the guidelines indicated below and conduct follow-on supervision/monitoring of execution. For emergency drawdowns in particular, the DSCA CPD must ensure that the EXORDs contain firm and specific requirements for materiel and services. For non-emergency situations and or drawdowns involving multiple countries, there will be an initial package developed and an EXORD issued with general supply/financial guidance to initiate the drawdown as quickly as possible. Subsequent EXORDs will be issued as additional countries sign section 505 agreements, requirement lists are firmed up, and projected costs for initial deliveries are reconciled.

C10.2. EXECUTE ORDER DEVELOPMENT

C10.2.1. Timing. The interagency will expect release of the drawdown Execute Order concurrent with signature of the PD for the drawdown. In order to accomplish this, the “final” version of the EXORD should be put into Interagency staffing by the DSCA CPD approximately 5-7 days before the expected signature of the PD (Note this is frequently a very “soft” date depending when State forwards the PD to the NSC who forwards it to the President). Joint Staff frequently requires 4-5 days minimum to complete its internal staffing and waits until it has seen Service comments before completing Joint Staff planning (particularly if any of the Services are expected to surface any OR impact issues). This can increase staffing time by an additional 3-5 days. In the case of “real” crisis drawdowns, these lead-times will likely be reduced.

C10.2.2. Execute Order Composition. The initial DSCA EXORD for any drawdown should include the following information as applicable, to preclude the need to issue supplemental instructions:

C10.2.2.1. Authority for the Drawdown (Legislation and PD) for DWCF.

C10.2.2.1.1. Service Taskings (by Service/Agency):

C10.2.2.1.1.1. Clear delineation of what is to be provided (include National Stock Number (NSN), quantity, sizes etc).

C10.2.2.1.1.2. Any Service unique instructions.

C10.2.2.1.2. Coordinating Instructions:

C10.2.2.1.2.1. Drawdown Project Code.
C10.2.2.1.2.2. Authorized FAD.

C10.2.2.1.2.3. Maintenance/Repair Standard.

C10.2.2.1.2.4. Training / Spare Parts / Support Equipment Requirement (if not already covered)

C10.2.2.1.2.5. Spare Parts Requisitioning Guidance:
   C10.2.2.1.2.5.1. Fill as for US Forces.
   C10.2.2.1.2.5.2. “Fill or Kill” requisitions.

C10.2.2.1.2.6. Allocation of Service RCN.

C10.2.2.1.2.7. Allocation of “Not to Exceed” dollar value of drawdown authority allocated to each Service / Defense Agency (Based on projected costs provided by each tasked agency).

C10.2.2.1.2.8. Identification of Basic Drawdown Policies:
   C10.2.2.1.2.8.1 No new contracting or procurement except for transportation.
   C10.2.2.1.2.8.2. Reimbursement of DWCF provided equipment/services.
   C10.2.2.1.2.8.3. Tasked Service funds movement to final destination, and report total Services costs, all deliveries and undelivered values into the DSCA 1000 System.

C10.2.2.1.3. Transportation Instructions:
   C10.2.2.1.3.1. RDD(s).
   C10.2.2.1.3.2. CCP / QAT(s) (if applicable).
   C10.2.2.1.3.3. Applicable APOE/WPOE(s).
   C10.2.2.1.3.4. Applicable APOD/WPOD(s).
   C10.2.2.1.3.5. Any special transportation instructions.
   C10.2.2.1.3.6. DODAAC and MAPAD address codes.
   C10.2.2.1.3.7. Any delivery or handling instructions at delivery locations.
C10.2.2.1.4. Termination Instructions: As indicated in paragraph C5.5, unless otherwise directed, a termination date not to exceed 18 months from date of execute order issuance will be stated.

C10.2.2.1.5. POC phone and fax numbers.

C10.3. EXECUTE ORDER COORDINATION

Execute Orders are normally coordinated with the following offices and staffs:

C10.3.1. State PM-RSAT.
C10.3.2. State Regional Bureau.
C10.3.3. OSD Policy Office (ISA, ISP or SOLIC).
C10.3.4. Tasked Services.
C10.3.5. Tasked Agencies.
C10.3.6. Joint Staff (J4 Logistics Directorate), Sustainment & International Logistics Division (SILD) as the lead division office).
C10.3.7. USTRANSCOM (either info or coordinating copies to SDDC and MSC).
C10.3.8. Applicable Combatant Command.
C10.3.9. Internal DSCA (GC, P3, OPS-ADMIN and BUS-OPS).

C10.4. POST-EXECUTE ORDER RELEASE ACTIONS

With release of the initial EXORD for the drawdown, DSCA and Service Action Officer’s can anticipate the following actions/requirements:

C10.4.1. Issuance of supplemental Service EXORDs (Service Action Officer’s).
C10.4.1.1. Clarification of EXORD guidance (as required).
C10.4.1.2. Monitoring status of Service/Agency execution status.
C10.4.1.3. Resolution of any policy and execution issues.
C10.4.1.4. Continued development of drawdown package if full authority was not allocated in the initial EXORD.
C10.4.1.5. Issuance of supplemental EXORDs, as required.

C10.4.1.6. Reminding OSD and State policy offices of the agreed upon lead-times.

C10.5. DSCA MONITORING

After release of the EXORD, DSCA CPD will spend most of his/her time in the above actions, particularly asking the Services for status reports. Acquisition of appropriate TCNs from the Services to support monitoring the shipping status should be undertaken for high-visibility shipments, particularly where there are multiple shipments and when cargo is shipped incrementally.
CHAPTER 11

FINANCIAL MANAGEMENT OF DRAWDOWNS

C11.1. FINANCIAL MANAGEMENT OF DRAWDOWNS

The key consideration in financial management of drawdowns is that DoD is not authorized to exceed the drawdown authority provided in the authorizing legislation and the Presidential Determination. (An Anti-Deficiency Act violation would result.) All efforts must be directed toward ensuring that all associated values are identified and tracked.

C11.2. VALUATION OF DRAWDOWN ARTICLES AND SERVICES

C11.2.1. Value of drawdown equipment articles is based on pricing policy contained in the DoD FMR 7000.14R, Volume 15, Chapter 7.

C11.2.1.1. Value of Defense Working Capital Fund (DWCF) items must equate to the DWCF standard price. Note that all DWCF items issued from inventory require funding by the MILDEP processing the requisition (FMR Vol. 12 Chapter 23, Section 2305).

C11.2.1.2. Value of non-excess investment assets not to be replaced, must equate to the sum of (a) the most recent actual procurement cost, (b) modifications or improvements incorporated after production and (c) non-recurring charge if applicable, adjusted for age or condition plus pro rate overhaul cost.

C11.2.1.3. Value of non-excess investment assets to be replaced (DoD budget/FYDP must reflect intent to acquire asset) must equate to the sum of (a) the estimated cost of the replacement and (b) non-recurring charge if applicable, adjusted for age or condition.

C11.2.2. Value of drawdown Military Education and Training shall be based on additional costs that are incurred by the USG in furnishing the training (i.e., FMF Grant/Incremental rate as specified in the DoD FMR Vol. 15).

C11.2.3. Value of services is based on actual costs to the USG for providing the service. Costs include funded portion of civilian salaries, but excludes salaries of the members of the US Armed Forces and unfunded civilian retirement and other benefits.

C11.2.4. FMS Administrative and Contract Administrative Services surcharges are not included in valuation of equipment and services for drawdowns. The valuation of drawdowns of defense articles and services, including military education and training transferred from DoD resources based on special legislation shall be determined on a case by case basis in accordance with the legislation. FMS surcharges are not included in valuation of these special drawdowns.
C11.2.5. Due to the often-abbreviated timelines available to develop V&A data for drawdowns, it is critical to ensure that projected values are as accurate as possible. Because of the short response time, there is a tendency for the Services to inflate their cost estimates until the scope of requirements is clearly defined. There may be subsequent criticism when actual costs are reconciled and found to be lower. However, the important point to remember is that by law DoD may not exceed the authorized authority. The key is close coordination between DSCA and the Service Action Officer’s, as the drawdown is executed to reconcile actual vs. projected costs as early as possible.

C11.3. FINANCIAL TRACKING OF DRAWDOWN COSTS

To keep track of projected and actual drawdown values the DSCA OPS-ADMIN and Service Action Officer’s keep compatible drawdown spreadsheets so that data can be compared and exchanged in a format that permits easy reconciliation of costs. A sample format is in Appendix 5.

C11.3.1. Minimum Drawdown Tracking Data. To support drawdown financial tracking, the required tracking data is as follows: Item/Service, Quantity, Unit Value (drawdown value), Equipment (Total Quantity Value), Services/Repair, Training (if applicable), Spare Parts, Support Equipment, PC&H, Transport, and Total Item/Service Value (sum of all other categories for each items). Salaries for civilian services should be separately identified. At the DSCA level, this spreadsheet should be organized to permit computation of the overall drawdown value by each category and by each Service/Defense Agency contribution. The sample at Appendix 5 provides such a structure with automatically computed Service/Defense Agency totals.

C11.3.2. O&M Impact - End Items vs. Services/Support Costs. A critical Service consideration for all drawdowns is how much of the projected value reflects actual outlay of current year O&M funds. All of the above categories EXCEPT the Equipment category involve the actual expenditure of Service O&M funds. As a minimum, there will always be O&M outlays to fund PC&H and transportation. If repair services, training, spare parts and support equipment are also required for the drawdown, these categories will usually involve direct O&M expenditures. The Equipment category is not considered to have an O&M impact (except for DWCF materials covered in paragraph C11.4.3) as the equipment was previously purchased and is a “sunk” value to the respective Service. While not having an O&M impact, accurate assessment of a “drawdown” value for equipment items is critical, as equipment frequently constitutes the majority of the value of any given drawdown. Drawdowns that are exclusively services, such as transport services, will have 100% O&M impact.

C11.3.3. Projected versus Actual Costs. Actual value assessments are normally not available until 30-90 days after actual delivery of the equipment. DSCA and Service Action Officer’s should maintain close coordination to update and replace projected costs in each category as soon as the firm value can be identified.
C11.4. REIMBURSEMENT FOR PROVIDED DWCF MATERIAL AND SERVICES

One of the contentious Service issues is the OSD Comptroller’s policy (DoD FMR Vol. 12, Chapter 23, Section 2305) that requires the Services use O&M funds to reimburse all equipment, materials, or services provided from Defense Working Capital Fund (DWCF) activities, including DLA and USTRANSCOM. The most common items are DLA-managed clothing items, individual equipment, spare parts, tools, and fuel, and support items such as batteries. The Services are required to provide funded (fill/kill) requisitions to DLA for such items. This is NOT considered a “new” procurement as it involves an internal transfer of funds within DoD to provide items that DoD previously purchased and put in its stocks.

C11.5. SERVICE REPORTING OF DRAWDOWN EXECUTION

The formal channel for Service/Defense Agency reporting of drawdown expenditures is the DSCA 1000 System. The DSCA 1000 System is the information management system for tracking, maintaining and aggregating drawdown data to fulfill management information needs and meet legislative reporting requirements. At least monthly, each Service or Agency must enter the appropriate programming and delivery data against appropriate RCNs into the DSCA 1000 System. Data entry has been one of the weakest links in drawdown financial management, as there seems to be a lack of understanding of the importance of timely data entry and a lack of internal Service guidance as to which Service Component(s) should enter and update this data. Therefore, close coordination is essential.

C11.5.1. Entering execution Data. As part of the initial EXORD, the DSCA CPD, with DSCA OPS-ADMIN coordination, assigns Record Control Numbers (RCNs) to each Service or Agency tasked to provide equipment or services for that drawdown. The RCN is a four-position alpha/numeric code assigned to each record in the DSCA 1000 System for identification purposes (see C8.12 Assignment of RCNs). The MAP Element Code field, record positions 47-50, should contain the 4-digit PD number assigned to the drawdown. Record Position 35 always contains "C". Drawdown transactions, including any training related to those drawdowns, will be reported in accordance with Appendix 8.

C11.5.1.1. Each Service/Agency SHOULD immediately enter the PROJECTED value data for each type of equipment or service, it is programmed to provide. As actual value data is received, the PROJECTED value data should be updated with ACTUAL value data in the DSCA 1000 System. See table C11.T1 for input data fields. Appendix 8 provides instructions for input data.

</table>
C11.5.2. United Nations Participation Act (UNPA) Transactions. UN requests for assistance under Section 7 of the UNPA are handled like drawdowns and tracked in the DSCA 1000 System. However, UNPA requests are unique in that they are not reimbursable (unlike Section 607, FAA, transactions) and may involve procurement (unlike drawdowns which are "fill or kill"). To track these transactions and also distinguish them from DoD drawdowns, use the standard United Nations "T9" country code and the 4-digit MAP Element Code (PD number) in record position 47-50, which contains the Tracking Number assigned to the UN request, consisting of three numeric digits and one alpha character in the fourth position of "U" (i.e., XXXU) -the fourth position must always be "U".

C11.5.3. Excess Defense Articles (EDA). Any EDA items provided in a drawdown should be entered in the DSCA 1000 System with a "Type of Assistance Code" of "C" in record position 35 along with a Source of Supply Code of "E" in record position 65. The "E" Source of Supply code indicates that the item is excess and automatically allows the cost field to remain blank. EDA items provided by drawdown must follow the procedures outlined in Chapter 11 of the SAMM.

C11.6. DRAWDOWN OF FUNDS

C11.6.1. A recent new development has been the drawdown of funds instead of items and services. A drawdown of funds is not specifically addressed in the SAMM, but is handled similarly to a SAMM C11.3 Counter-narcotics assistance-National Defense Authorization Acts, Sections 1004 and 1033.

C11.6.2. An S9 pseudo case designator is used to track the sale of defense articles and/or services to the recipient. The Pseudo LOA itemizes the defense articles and/or services, it is NOT signed by the country and/or organization receiving the articles and/or services.

C11.6.3. A drawdown EXORD is written which breaks out how much funding each Military Department (MILDEP) provides, and what that funding is to be used for. The S9 cases align the funds according to the EXORD.

C11.6.4. Since the MILDEP funding used is Operations and Maintenance (O&M) appropriated funding, it is one-year money. This means that obligations can only be made against the S9 case until the end of the FY the funds are appropriated in. There is a further five years for obligation adjustments and disbursements. At the end of that year, the funds are cancelled. This calls for stringent management of the case to ensure the funds are appropriately handled.

C11.6.5. The O&M funds appropriation is cancelled at the end of the sixth year. Therefore,
every effort must be made to have all bills paid and the cases closed before the end of the sixth year.

C11.6.6. A separate holding account should be established for each year that drawdown funds are used on S9 cases. This allows funds from cases that close with funds remaining to be used for cases that close with a need for additional funds. A new EXORD will be required to move the funds through the holding account to the new cases. Appendix 9 provides a chart with a brief synopsis of the Presidential Determined drawdown, flow of funds for an S9 case.

C11.7. CONGRESSIONAL REPORTING

The DSCA OPS-ADMIN Office has the lead for preparing statutorily required reports (also see C12.3 Congressional Reporting).
C12. CHAPTER 12

RECONCILIATION AND REPORTING TO CONGRESS

C12.1. FINANCIAL RECONCILIATION

Immediately after or concurrent with delivery, of the equipment and/or services, the DSCA CPD should coordinate with the Service/Defense Agency Action Officer’s to reconcile projected and actual execution value. This effort cannot wait until completion of all deliveries, but should be a continual process as actual values become available. Due to delayed or non-reporting of the data into the DSCA 1000 System by the Service Components, this effort is frequently conducted by exchange/comparison of DSCA and Service Action Officer spreadsheets, and DSCA’s 1000 System Report (See appendix 8). Once the CPD determines that all commodities/services actions are completed and/or the drawdown authority is exhausted, the CPD will send out a drawdown termination message, terminating all new supply actions. The closure action allows J4-SILD to close the project code assigned to the drawdown. The termination message will also request Services to report all financial data into the DSCA 1000 System to allow the DSCA OPS-ADMIN Office to prepare its report to Congress.

C12.2. CONGRESSIONAL REPORTING

The DSCA OPS-ADMIN Office has the lead for preparing statutorily required reports.

C12.2.1. FAA, Section 506 Report. FAA, section 506 (reference (b)) requires the Department of Defense (DSCA) to report to Congress details on all the defense articles, defense services, and military education and training delivered to the recipient country or international organization upon delivery or completion of such articles, services, or education and training. The report must also include whether any savings were realized by utilizing commercial transportation services rather than acquiring those services from USG transport assets.

C12.2.2. Special Authorities. For “special” drawdown authorities, there may be additional reporting requirements authorized by legislation in any fiscal year.

C12.2.3. FAA, Section 655. Annual military assistance reporting is required on ALL drawdowns. The report covers defense articles (including excess defense articles (EDA)), defense services, and military training and education furnished by grant under any authority of law, except under title V of the National Security Act of 1947.

C12.2.4. FAA, Section 506, require that the Drug Interdiction and Counter Drug Activities Report be reported to Congress listing equipment DoD provided via counternarcotics drawdown efforts and the DoD’s plans for replacing it, whether totally, partially, or not at all. This report gives Congress a sense of the adverse impact of drawdowns on DoD resources and US military readiness. In addition to equipment listings, DSCA requests the Services to also provide impact statements for submission to Congress.
(Intentionally Left Blank)

MEMORANDUM FOR ASSISTANT SECRETARY OF THE ARMY (FINANCIAL MANAGEMENT)  
ASSISTANT SECRETARY OF THE NAVY (FINANCIAL MANAGEMENT)  
ASSISTANT SECRETARY OF THE AIR FORCE (FINANCIAL MANAGEMENT AND COMPTROLLER)  
COMPTROLLER, DEFENSE LOGISTICS AGENCY  
COMPTROLLER, UNITED STATES TRANSPORTATION COMMAND  
DIRECTOR, FORCE STRUCTURE, RESOURCES AND ASSESSMENT, THE JOINT STAFF

SUBJECT: Reimbursement of DBOF Activities for Contingency Operations and Humanitarian Efforts

This memorandum provides policy for funding contingency operations costs at DBOF activities and documents the funding procedures for contingencies and similar actions that have normally been followed in the past. The intent is to clarify the process and establish Military Department responsibilities for payment. This policy will be incorporated into various instructions as they are revised and published.

All DBOF business areas, including transportation services provided by USTRANSCOM, operate on a reimbursement basis with users paying for goods and services provided. Payment for contingency operations, including deployment or other emergency response for military or humanitarian assistance, is no exception: The users ordering the DBOF service must pay the bill, and no orders are to be accepted without funding. The Military Department Headquarters is responsible for determining which level within the Military Department will pay (i.e., Unit, major command, or Military Department level). This process also applies when a Unified Commander tasks a Service-funded unit to perform a mission (such as transportation of Service personnel or equipment by USTRANSCOM). The parent Military Department that owns the equipment or personnel is responsible for payment of costs incurred to accomplish the mission.

The sole exception to this policy occurs when CINCPACOM receives an order from JCS requiring transportation of non-U.S. owned equipment and/or non-U.S. personnel such as unreimbursed efforts in support of the U.N. In these instances, Army will pay MTMC costs, Navy will pay MSC costs, and Air Force will pay AMC costs.

Bills can be centralized for more convenient processing if appropriate; however, billings will be forwarded to the appropriate Military Department within 30 days from commencement of the contingency operation or humanitarian effort. Payment of these bills, including transportation bills, by the Military Departments must be made in a timely manner.
This guidance does not address any contingency operation designated by the Secretary of Defense as a "National Contingency Operation" under the Provision of 10 U.S.C. Section 127. Special rules would apply for such an operation, and those rules would be promulgated separately in conjunction with any designation by the Secretary under the provisions of that section.

SAMPLE PRESIDENTIAL DETERMINATION (PD) AND MEMORANDUM OF JUSTIFICATION

THE WHITE HOUSE
WASHINGTON
September 30, 1999

Presidential Determination
No. 99-43

MEMORANDUM FOR THE SECRETARY OF STATE
THE SECRETARY OF THE TREASURY
THE SECRETARY OF DEFENSE
THE ATTORNEY GENERAL
THE SECRETARY OF TRANSPORTATION

SUBJECT: Drawdown Under Section 506(a)(2) of the Foreign Assistance Act to Provide Counter-Drug Assistance to Colombia, Peru, Ecuador, and Panama

Pursuant to the authority vested in me by section 506(a)(2) of the Foreign Assistance Act of 1961, as amended, 22 U.S.C. 2318(a)(2) (the "Act"), I hereby determine that it is in the national interest of the United States to draw down articles and services from the inventory and resources of the Department of Defense, military education and training from the Department of Defense, and articles and services from the inventory and resources of the Departments of Justice, State, Transportation, and the Treasury for the purpose of providing international anti-narcotics assistance to Colombia, Peru, Ecuador, and Panama.

Therefore, I direct the drawdown of up to $72.55 million of articles and services from the inventory and resources of the Departments of Defense, Transportation, Justice, State, and the Treasury, and military education and training from the Department of Defense, for Colombia, Peru, Ecuador, and Panama for the purposes and under the authorities of chapter 8 of part I of the Act.

As a matter of policy and consistent with past practice, my Administration will seek to ensure that the assistance furnished under this drawdown is not provided to any unit of any foreign country's security forces if that unit is credibly alleged to have committed gross violations of human rights unless the government of such country is taking effective measures to bring the responsible members of that unit to justice.
The Secretary of State is authorized and directed to report this determination to the Congress immediately and to arrange for its publication in the *Federal Register*.

*William J. Clinton*
MEMORANDUM OF JUSTIFICATION
FOR USE OF SECTION 506(a) (2) AUTHORITY
TO DRAW DOWN ARTICLES, SERVICES, AND MILITARY
EDUCATION AND TRAINING

Due primarily to the rapidly deteriorating situation in Colombia, there is a
critical need for us to provide additional Counternarcotics (CN) support to the
governments of Colombia, Peru, Ecuador, and Panama. Increased efforts by
these governments to eradicate illegal drug crops produced in their countries
and to interdict drugs en route through their countries at once reduce the
availability of drug-financed support to anti-government forces in these
countries and to reduce the flow of drugs into the United States. Specifically,
these governments are in critical need of counternarcotics (CN) assistance
beyond that which we can provide through International Narcotics Control (INC)
funding. We propose that such assistance be provided under the authority of
section 506 (a) (2) of the FAA.

Under our proposal, the President would direct a drawdown of up to $69.7
million in articles, services, transportation, and military education and training
from the Department of Defense to support our counternarcotics strategy within
the Western Hemisphere. Of this, we estimate that approximately $56 million
would be used to bolster the counternarcotics efforts of the Colombian National
Police (CNP) and Colombian military elements which directly support the CN
effort; approximately $4.0 million would go to support the Peruvian National
Police and elements of the Peruvian military; approximately $3.4 million would
support police and military elements in Ecuador, and approximately $0.3 million
would support security forces in Panama. Finally, approximately $6.0 million
of this authority would be expended from DoD operational funds for packing,
crating, handling, transportation, and related support for this package.

The President would also direct a drawdown of up to $1.1 million in
articles and services from the Department of Transportation Coast Guard
(USCG) to support counternarcotics efforts in Colombia. (This authority will be
used to facilitate hot handoff of Coast Guard vessels we intend to provide to
Colombia, as Excess Defense Articles (EDA) early in FY 01. It will not affect
the current EDA allocation program.)
The President would also direct a drawdown of up to $625 thousand in articles and services from the Department of the Treasury to support counternarcotics efforts. Of this, we would estimate that approximately $525 thousand would support Ecuador and the remainder would support Panama.

The President would also direct a drawdown of up to $125 thousand in articles and services from the Department of Justice (DEA) to support counternarcotics efforts. Of this, we would estimate that approximately $50 thousand would support Panama and approximately $75 thousand would support Ecuador.

Finally, the President would direct a drawdown of approximately $1.0 million in articles and services from the Department of State (INL) to support counternarcotics efforts in Colombia.

The Director of the Office of National Drug Control Policy (ONDCP), the NSC staff, the Secretaries of Defense, Transportation, and the Treasury, and the Attorney General concur with this proposal.

Depending on the situation in receiving countries, selected end items provided will be accompanied by a package of available spare parts, equipment reception assistance, and user and maintenance training as appropriate--and as availability from agency inventory and resources dictate.

The narcotics and security situation in Colombia continues to deteriorate. Coca cultivation, including higher yield varieties, has increased close to 50 percent over the last two years. Heroin cultivation and production has also increased. The vast majority of the new coca cultivation is in Putumayo and Caqueta--areas where the GOC has not been able to conduct effective CN operations due to infestation by heavily armed anti-government forces supporting trafficking interests. Complicating the GOC's ability to meet these challenges, the Colombian economy is in the worst condition that it has seen in 50 years. The approximately $58.1 million in this package would support the Colombian Military and National Police in their effort to conduct vigorous CN operations throughout the country-but concentrating in the South. We would also increase the Colombian Air Force's ability to interdict air trafficking into, out of, and within Colombia-and onward toward the United States. Support for the CNP will facilitate its law enforcement, interdiction, and eradication programs-and its ability to conduct joint CN operations with the Colombian Military.
We anticipate providing the CNP with weapons, ammunition, explosives, spare parts, field and flight gear, operational fuel, field aviation support equipment, base defensive items, and training. For the Colombian military, we anticipate providing aircraft spares, fuel, weapons, ammunition, explosives, field and flight gear, hot handoff of USCG coastal patrol craft to be provided under Excess Defense Article authority, base defensive items, field rations, aviation management support, and training.

The effect of this situation is not limited to Colombia. In Peru, despite intensive efforts by CN forces, traffickers are adjusting to the GOP's highly successful operation against air trafficking. Not only are they adjusting their flight patterns, but also cocaine base is reported to be moving on Peruvian rivers and overland across the Andes--where some of it was processed into HCl for subsequent shipment from Peruvian ports and airports. We intend to provide some $4.0 million of assistance to furnish the Peruvian National Police, Air Force, and Coast Guard with aircraft spares, field and flight equipment, field rations, life support equipment, field aviation support equipment, fuel, training, and field bridging equipment.

Ecuador continues to be a major transit country for cocaine hydrochloride (HCl), primary from Colombia, destined for the United States and Europe. Colombian traffickers control much of the cocaine smuggled into Ecuador. Colombian heroin and Peruvian HCl also transit Ecuador. Ecuador is used to import essential chemicals for cocaine production and to launder money. The Government of Ecuador (GOE) fully cooperates with the USG in the fight against narcotics trafficking. We anticipate furnishing approximately $4.0 million of assistance to the Ecuadorian Military and Police—particularly those serving in or supporting units along the frontier with Colombia. We plan to provide them with spare parts, weapons, ammunition, and training.

Panama's role as a major transit point for illicit drugs heading to North America and other global markets is enhanced by its proximity to Colombia, remoteness of its frontier with that country, location on key transportation routes, openness to trade, and generally weak controls along borders and coasts. We must continue to improve the CN capabilities of Panama's weak security forces—including ground-based CN units, the National Maritime Service (SNM-coast guard), and National Air Service (SAN)—enabling them to become effective participants in efforts to intercept illicit drug shipments. With some $450 thousand of assistance we would like to provide Panama with small boats, counternarcotics equipment, patrol and administrative vehicles, weapons, night vision devices, crew safety items, support equipment, and training.
As mentioned earlier, DoD will furnish packing, crating, handling, transportation, and related support for this package valued at approximately $6.0 million of drawdown authority.

Section 506(a) (2) Drawdown

No assistance will actually be delivered under the drawdown unless the particular recipient government has provided appropriate end-use, retransfer, and security assurances in accordance with section 505 of the FAA, including agreement that equipment provided under this drawdown will be used for counternarcotics purposes.

The President has determined that the provision of the aid described herein is in the national interest of the United States. The drawdown will be directed during fiscal year 1999, with the result that it would count against the ceilings for fiscal year 1999, though it is anticipated that deliveries would be completed thereafter.

AP5. APPENDIX 5
(PD 99-43 506(a)(2) Counternarcotics Delivery Report)
APPENDIX 6
THIS IS A FOUR PART MESSAGE (PART 1)

SUBJECT: FY99 506(A)(2) DRAWDOWN IN SUPPORT OF ANTI-NARCOTICS OPERATIONS IN COLOMBIA, PERU, ECUADOR, AND PANAMA. EXECUTE ORDER I.

GENERAL INSTRUCTIONS

REFS:
A. PRESIDENTIAL DETERMINATION (PD)03-15 SIGNED 30 SEPTEMBER 2003
B. DEFENSE TRANSPORTATION REGULATION AND PART TWO-CARGO MOVEMENT, DOD 4500.9-R
C. DOD COMPTROLLER MEMORANDUM DATED 28 JULY 1994, SUBJ: REIMBURSEMENT OF DBOF ACTIVITIES FOR CONTINGENCY OPERATIONS AND HUMANITARIAN EFFORTS.
D. SOUTHCOM MESSAGE 161910Z DEC 03 TEMPORARY UPGRADE OF FAD FOR COLOMBIA.

MESSAGE DATE TIME GROUP (DTG) IS ASSIGNED AFTER THE EXORD PACKAGE STAFFING PROCESS IS COMPLETE, THEN THE MESSAGE IS RELEASED.

SAMPLE EXECUTE ORDER (MODIFIED AND ANNOTATED)

THIS MUST TAILOR AUTODIN MESSAGE ADDRESSES FOR DISTRIBUTION ACCORDINGLY. SINCE THE AUTODIN SYSTEM HAS BEEN REPLACED BY THE DEFENSE MESSAGING SYSTEM (DMS), AUTODIN ADDRESS BOOKS ARE NO LONGER DISTRIBUTED. UNTIL DMS BECOMES OPERATIONAL, THE ONLY SOURCE FOR AUTODIN ADDRESS UPDATES (ACP-117) IS THE PENTAGON MESSAGE CENTER AT 703-695-0205/-6055.
PART ONE FOR ALL

1. On 30 September 2003, the President signed a presidential determination, referring up to $72.55 million of inventories and resources from the stocks of various U.S. departments of state, defense, and military training/education from DOD (and specifically $69.7 million in inventories and resources from the Department of Defense) under the authority of Section 506(a)(2) of the Foreign Assistance Act (FAA) of 1961, as amended, to support counternarcotics activities by the Governments of Colombia, Peru, Ecuador, and Panama. This message directs addressees to execute this drawdown and provides general planning instructions. If required additional information will be provided in subsequent exords.

2. Countries supported by this executive order have valid end use agreements in accordance with section 505 of the FAA (herein after referred to as a '505 agreement') that allows for the provision by DOD of any inventories or resources under this drawdown. These agreements specifically address end use of inventories and resources provided under this drawdown as being used solely for counternarcotics purposes. U.S. country teams have been requested by the department of state to review the drawdown content from the point of view that host government placement of these items will meet USG requirements and that equipment and services be used for counter narcotics purposes. Countries eligible to receive inventories and resources from this drawdown (i.e. have signed new or amended 505 agreements covering the FY99 506 counternarcotic drawdown) are Colombia, Peru, Ecuador, and Panama. Guidance to the services for the release of DOD inventories and resources to these four countries is provided in this executive order.

3. All inventories and resources provided under this authority must be from existing stocks/resources new procurement is not authorized under the provisions of Section 506(a)(2) of the FAA (except transportation and related services acquired by contract for purposes of this drawdown if the cost is less expensive than the cost to the USG of providing services from existing agency assets).

4. The President, through DOD, is required to report to Congress all costs incurred and deliveries (packing, crating, handling, and transportation) of commodities and services provided under the authority of this PD. The DSCA 1000 system is the vehicle for this reporting. Each implementing agency will submit the appropriate programming and delivery data to the 1000 system as soon as possible. Guidance is provided in chapter 11, section 1102 of the security assistance management manual, DOD 5105.38M. Guidance should contain the presidential directive number 99-43, and card column 35 should contain a 1. Any inventory or resource entered into the DSCA 1000 system should be reviewed and updated as necessary to reflect the cost of anticipated final costs. We cannot overemphasize the importance of the need for implementing agencies to provide updates during the course of the drawdown.

5. Record control numbers (RCN) will be used to track the inventory in the DSCA 1000 System. Each record control number will be assigned for each line item. Programming data should be submitted by services into the DSCA 1000 system ASAP.

C. IMPLEMENTING AGENCIES WILL PROCESS ALL REQUISITIONS FOR ANY DEFENSE LOGISTICS AGENCY CONTROLLED INVENTORIES AND RESOURCES PROVIDED UNDER THIS DRAWDOWN AS BEING USED SOLELY FOR COUNTERNARCOTICS PURPOSES. U.S. DEPARTMENT OF STATE HAS REQUESTED A REVIEW OF THE HOST GOVERNMENT PLACEMENT OF THESE ITEMS WILL MEET USG REQUIREMENTS AND THAT EQUIPMENT AND RESOURCES PROVIDED UNDER THIS DRAWDOWN (I.E. HAVE SIGNED NEW OR AMENDED 505 AGREEMENTS COVERING THE FY99 506 COUNTERNARCOTIC DRAWDOWN) ARE COLOMBIA, PERU, ECUADOR AND PANAMA. GUIDANCE TO THE SERVICES FOR THE RELEASE OF DOD INVENTORIES AND RESOURCES TO THESE FOUR COUNTRIES IS PROVIDED IN THIS EXECUTIVE ORDER.

6. Services will ensure all requisitions for materiel submitted to the source of supply (SOS)/inventory control point (ICP) contain:

A. THE SPECIFIC NSN AND QUANTITY NEEDED. STANDARD DOD PRICES REFLECTED IN THE CATALOGING WILL BE USED TO ACCUMULATE COST DATA ON COMMODITIES/SERVICES FURNISHED UNDER THE RCN.

B. EXCEPT WHERE INDIATED IN THIS OR FUTURE MESSAGES, FORCE ACTIVITY DESIGNATOR THREE (FAD III) IS AUTHORIZED FOR THIS DRAWDOWN AUTHORITY. FORCE ACTIVITY DESIGNATOR TWO (FAD II) IS AUTHORIZED FOR COLOMBIA AS EQUIPMENT PROVIDED WILL SUPPORT COUNTERNARCOTICS OPERATIONS PER REFERENCE D. ALL REQUISITIONS TO COLOMBIA SHOULD BE PROCESSED AS FADII. ISSUE PRIORITY DESIGNATOR (IPD) WILL BE IN ACCORDANCE WITH THE AUTHORIZED FAD LEVEL.

C. FILL OR KILL ADVICE CODE 2J, 31 OR 33 (AS APPROPRIATE) WILL BE USED (NEW PROCUREMENT IS NOT AUTHORIZED UNDER THE PROVISIONS OF SECTION 506(A)(2) OF THE FAA (EXCEPT TRANSPORTATION AND RELATED SERVICES ACQUIRED BY CONTRACT FOR PURPOSES OF THIS DRAWDOWN IF THE COST IS LESS EXPENSIVE THAN THE COST TO THE USG OF PROVIDING SERVICES FROM EXISTING AGENCY ASSETS).

D. EACH IMPLEMENTING AGENCY WILL PREPARE A LIST OF REQUISITIONS TO BE SUBMITTED TO THE SOURCE OF SUPPLY (SOS)/INVENTORY CONTROL POINT (ICP). THE LIST OF REQUISITIONS WILL BE SUBMITTED AS SOON AS POSSIBLE. EACH IMPLEMENTING AGENCY WILL SUBMIT THE LIST OF REQUISITIONS TO THE SOURCE OF SUPPLY (SOS)/INVENTORY CONTROL POINT (ICP)およ

E. SERVICES MUST USE THE APPROPRIATE PROGRAMMING AND DELIVERY DATA TO THE 1000 SYSTEM AS SOON AS POSSIBLE. Guidance is provided in chapter 11, section 1102 of the security assistance management manual, DOD 5105.38M. Guidance should contain the presidential directive number 99-43, and card column 35 should contain a 1. Any inventory or resource entered into the DSCA 1000 system should be reviewed and updated as necessary to reflect the cost of anticipated final costs. We cannot overemphasize the importance of the need for implementing agencies to provide updates during the course of the drawdown.

F. RECOR

G. SERVICES WILL ENSURE ALL REQUISITIONS FOR MATERIEL SUBMITTED TO THE SOURCE OF SUPPLY (SOS)/INVENTORY CONTROL POINT (ICP) CONTAIN:

A. THE SPECIFIC NSN AND QUANTITY NEEDED. STANDARD DOD PRICES REFLECTED IN THE CATALOGING WILL BE USED TO ACCUMULATE COST DATA ON COMMODITIES/SERVICES FURNISHED UNDER THE RCN.

B. EXCEPT WHERE INDIATED IN THIS OR FUTURE MESSAGES, FORCE ACTIVITY DESIGNATOR THREE (FAD III) IS AUTHORIZED FOR THIS DRAWDOWN AUTHORITY. FORCE ACTIVITY DESIGNATOR TWO (FAD II) IS AUTHORIZED FOR COLOMBIA AS EQUIPMENT PROVIDED WILL SUPPORT COUNTERNARCOTICS OPERATIONS PER REFERENCE D. ALL REQUISITIONS TO COLOMBIA SHOULD BE PROCESSED AS FADII. ISSUE PRIORITY DESIGNATOR (IPD) WILL BE IN ACCORDANCE WITH THE AUTHORIZED FAD LEVEL.

C. FILL OR KILL ADVICE CODE 2J, 31 OR 33 (AS APPROPRIATE) WILL BE USED (NEW PROCUREMENT IS NOT AUTHORIZED UNDER THE PROVISIONS OF SECTION 506(A)(2)). THIS WILL ENSURE THE ICP PROCESSING REQUISITION WILL INITIATE NEW PROCUREMENT.

PART TWO - SUPPLY GUIDANCE

7. THE PURPOSE OF THIS SECTION IS TO PROVIDE POLICY AND SUPPLY GUIDANCE AS FOLLOWS:

A. ALL ARTICLES PROVIDED IN THIS DRAWDOWN WILL BE IN AT LEAST CONDITION CODE 7.

B. OR -10/-20 STANDARD, AND FULLY MISSION CAPABLE (NOT DEMILITARIZED'), AND UNLESS OTHERWISE INDICATED DSCA EXECUTE ORDER. ALL ICPs PROCESSING REQUISITIONS WILL ISSUE ON HAND STOCKS IAN CURRENT SUPPLY POLICY GUIDANCE CONTAINED IN REFERENCE B. END ITEMS WILL BE PROVIDED WITH ALL PUBLICATIONS AND ON BOARD VEHICLE EQUIPMENT/TOWS ('OEOM GEAR') AS WOULD NORMALLY BE ISSUED TO U.S. FORCES.

B. SERVICES ARE AUTHORIZE

C. IMPLEMENTING AGENCIES WILL PROCESS ALL REQUISITIONS FOR ANY DEFENSE LOGISTICS AGENCY CONTROLLED Equipment. Any requests for DLA managed supplies and services are to be funded by the requesting implementing agency. Services shall provide fund codes and 'bill to' DODAAC to DLA prior to submitting requisitions. This information should be forwarded to DLA-FOXS, Tel: (703) 767-7209, DSN 427-7209 or SPARES should be requisitioned on a 'fill or kill' basis. Follow-on guidance will be provided for subsequent processing of 'killed' CSP requisitions. DLA is authorized to fill requisitions for secondary items in uniform materiel movement and issue priority system (UMMIPS) issue priority designator (IPD) sequence as if the requisitions originated with US forces. DLA is authorized to fill requisitions below the reorder point.
D. PROJECT CODE **3JD** HAS BEEN ASSIGNED FOR USE BY ALL SERVICES FOR COMMODITIES AND SERVICES PROVIDED IN ACCORDANCE WITH THIS DRAWDOWN. THIS CODE WILL BE UTILIZED ON ALL SUPPLY AND TRANSPORTATION DOCUMENTATION CONCERNED WITH THIS DRAWDOWN. ALL SHIPPING ACTIVITIES WILL ENSURE THAT THIS PROJECT CODE IS REFLECTED THE PROJECT CODE FIELD (BLOCK 8) AND THE APPLICABLE MAPAC AND CLEAR TEXT MARK-FOR ADDRESS IS PRINTED IN THE 'MARK FOR' SECTION (BLOCK 9) OF THE MILITARY SHIPMENT LABEL (DD FORM 1387) WHICH IS AFFIXED TO THE OUTSIDE OF EACH SHIPMENT UNIT. SHIPPING ACTIVITIES WILL ENSURE COPIES OF ALL DD FORMS 1348 ARE ENCLOSED IN A PROTECTIVE ENVELOPE AND SECURELY ATTACHED TO THE OUTSIDE OF EACH PACKAGE/CONTAINER. THE RCN SERIES ASSIGNED FOR THIS DRAWDOWN ARE AS INDICATED BELOW. THESE RCNS ARE FOR REPORTING END ITEMS, PC&H, TRANSPORTATION, AND SERVICES.

PART THREE - TRANSPORTATION GUIDANCE

B. STANDARD DOD PROCEDURES WILL BE USED TO SUBMIT TRANSPORTATION REQUIREMENTS. SERVICES WILL ADDRESS, RELEASE AND SHIP MATERIEL IN ACCORDANCE WITH CURRENT MILSTRIP, MILSTAMP AND MAPAD PROCEDURES. SERVICES WILL MAKE FULL USE OF COMMERCIAL CONTRACT TRANSPORTATION SERVICES INCLUDING THE USE OF NEW CONTRACTS IF THE COST IS LESS THAN USING READILY-AVAILABLE DEFENSE TRANSPORTATION SYSTEM ASSETS (CONSIDERING URGENCY OF SHIPMENT). COSTS OF CARGO PREPARATION, PACKAGING, AND SHIPPING TO ULTIMATE DESTINATION WILL ALSO BE ABSORBED BY SERVICES AS PART OF THIS DRAWDOWN AND RECORDED USING APPROPRIATE RCNS SHOWN ABOVE.

D. STANDARD DOD MARKING AND LABELING PROCEDURES PRESCRIBED BY MIL-STD-129 AND DOD 4500.32R (MILSTAMP) WILL BE USED.

E. DOD TRANSPORTATION RATES WILL BE USED FOR DRAWDOWN ACCOUNTING.

F. U.S. MILITARY REPRESENTATIVES IN EACH RECIPIENT COUNTRY WILL ESTABLISH MAPAD ADDRESSES THAT WILL AFFECT USE OF THE CONSOLIDATION POINT. WHEN POSSIBLE, REQUISITIONS/MROS WILL BE SUBMITTED WITH THE APPROPRIATE ADDRESS DATA IN THEM THAT WILL GENERATE SHIPMENTS TO THE CONSOLIDATION POINT. IF THE ITEM IS NOT IN STOCK OR THE DRAWDOWN OF THE SPECIFIC GOODS/SERVICES FROM MILDEP STOCKS WILL HAVE A SEVERE DETRIMENTAL IMPACT ON THE OPERATIONAL READINESS OF THEIR MILITARY DEPARTMENT, EXTENSIVE PRE-COORDINATION WITH SERVICES, ICPS, STATE DEPT. AND CONGRESS SHOULD PRECLUDE NON-AVAILABILITY OF ITEMS CALLED FOR IN THIS OR SUBSEQUENT EXORDS. DRAWDOWN OF THE GOODS/SERVICES MAY NEVERTHELESS BE REQUIRED OR MODIFIED BY SUBSEQUENT EXECUTE ORDER.

H. ALL SHIPMENTS WILL BE UNCLASSIFIED UNLESS OTHERWISE INDICATED.

1. INTERNATIONAL SMALL PARCEL EXPEDITED SERVICES (E.G. FEDEX) WILL NOT BE USED UNLESS REQUESTED BY AN IN-COUNTRY U.S. MILREPS REPRESENTATIVE TO EXPEDITE A SPECIAL URGENT REQUIREMENT.

J. FOR COORDINATION PURPOSES ONLY, FOLLOWING ARE TRANSPORTATION/DELIVERY POINTS OF CONTACT (POCS) FOR AMEMBASSY COLOMBIA CAPT BARRY BREWER OR MS. PART FOUR FOR DEPARTMENTS OF THE ARMY, NAVY AND AIR FORCE

9. THE FOLLOWING SECTION IS PROVIDED FOR MILDEP PLANNERS TO BEGIN EXECUTION OF THIS DRAWDOWN. QUANTITIES, WHERE SHOWN, WERE ESTIMATED BY MILDEP PLANNERS. WHERE NO QUANTITY IS SHOWN, SERVICES ARE REQUESTED TO SHIP QUANTITIES AVAILABLE UP TO THE FUNDING THRESHOLD PROVIDED FOR IN THAT CATEGORY. FOR WEAPONS, AMMUNITION, EXPLOSIVES AND PYROTECHNICS SERVICES MUST COORDINATE WITH MILGROUPS TO DETERMINE SPECIFIC DODAC QUANTITIES AVAILABLE UP TO THE FUNDING THRESHOLD PROVIDED FOR IN THAT CATEGORY.

2. EFFECTIVE IMMEDIATELY, NO FURTHER ACTION WILL BE TAKEN TO DRAW DOWN DEPARTMENT OF DEFENSE EQUIPMENT, SERVICES, OR TRAINING UNDER THE AUTHORITIES OF PD 00-27.
3. SERVICES WILL REPORT FINAL ACTIVITIES PER INSTRUCTIONS IN REF S A THROUGH I, INCLUDING FINAL COSTS ASSOCIATED WITH THE SUBJECT DRAWDOWN INTO THE DSCA-1000 SYSTEM LAW REFERENCES A THROUGH K WITHIN 60 DAYS OF RECEIPT OF THIS MESSAGE.
DSN FOR 601 PREFIX IS 329, AND DSN 664 FOR PREFIX 604.
CONGRESSIONAL LETTER

In reply refer to:
I-00/14393-FM

The Honorable Jerry Lewis
Chairman, Committee on Appropriations
House of Representatives
Washington, DC 20515

Dear Mr. Chairman:

This report is made pursuant to the requirements of Section 506(b)(2) of the Foreign Assistance Act of 1961, as amended, to inform you that the Department of Defense completed delivery of the defense articles and services on the attached list by December 1997.

Pursuant to Section 506(a)(1) of the Act, Presidential Determination 96-55 (PD), dated 30 September 1996, directed the provision of defense articles from the stocks of the Department of Defense, defense services of the Department of Defense, and military education and training to provide assistance to the countries that participated in the Economic Community of West African States’ Peacekeeping Force (ECOMOG), to enhance ECOMOG’s peacekeeping capabilities to bring about a peaceful solution to the crisis in Liberia. The PD authorized the drawdown of goods and services up to a total of $5,000,000.

Sincerely,

Attachment
As stated
ECONOMIC COMMUNITY OF WEST AFRICAN STATES’
PEACEKEEPING FORCE (ECOMOG)
Presidential Determination 96-55

The following countries received goods and services under Presidential Determination Number 96-55: Nigeria, Ghana, Sierra Leone, Mali and Guinea.

Cost Breakout of Goods and Services Provided to Participating Countries

($) in Thousands)

- Organizational Clothing and Individual Equipment: 332
- Medical Supplies: 1,349
- Transportation: 1,990

TOTAL: 3,672
Prepared by: Margaret Webb, DSCA/COMPT/FM/IM, 703-601-3741, X37, PD96-55

Example DSCA 1000 System Reporting

1000 ACCESS SYSTEM

To access the system, users must be able to access DSCA’s Unclassified Network and have Access 2000 installed on their computer. A shortcut icon will be placed on their desktops to access the system. Users will double click on the icon and the system’s Main Menu will appear as shown below.

There are three options on this screen. Users will be able to create add, change and delivery transactions for the 1000 System update hosted on the Unclassified RISC6000 and create queries and reports from the Database Window option using the 1000 Master File.

The 1000 System Master File will be copied to this application after every update has been performed.

If you experience any problems with the 1000 Access System, please call Sandra Pinder at 703-601-3759.
CREATE MATERIEL ADD TRANSACTIONS

Click on the CREATE ADD TRANSACTIONS button and the following screen will appear.

The Transaction Code, Reason Code, Type of Assistance Code and Status fields have default values and can be changed.

The Quantity and Total Cost fields have default values of zeros. When entering a value in these fields make sure the value contain leading zeros.

Required fields for add transactions have an asterisk before the field name. If no data is entered or invalid data is entered, an error message will appear. After you have finished entering data on the screen, click on the ADD A RECORD button, to add the record to the MATERIEL table.

When you have finished adding all your transactions, click on the WRITE MATERIEL TRANSACTIONS TO NETWORK button. A file will be created on the network server for retrieval by the 1000 System Project Officer to update the 1000 System. An email message will be sent to the Project Officer that a file has been created for retrieval.
CREATE MATERIEL CHANGE TRANSACTIONS

Click on the CREATE CHANGE TRANSACTIONS button from the main menu and the following screen will appear.

The Transaction Code, Reason Code, Type of Assistance Code and Status fields have default values and can be changed.

The Quantity and Total Cost fields have default values of zeros. When entering a value in these fields make sure the value contain leading zeros.

Required fields for change transactions have an asterisk before the field name. If no data is entered or invalid data is entered in these fields, an error message will appear. After you have finished entering data on the screen, click on the ADD A RECORD button, to add the record to the MATERIEL table.

When you have finished adding all your transactions, click on the WRITE MATERIEL TRANSACTIONS TO NETWORK button. A file will be created on the network server for retrieval by the 1000 System Project Officer to update the 1000 System. An email message will be sent to the Project Officer that a file has been created for retrieval.
CREATE DELIVERY TRANSACTIONS

Click on the CREATE DELIVERY TRANSACTIONS button and the following screen will appear.

The Transaction Code field has a default value of 8.

All fields on the Delivery Transaction screen are required. The Delivery Period field is the last two digits of the Fiscal Year and the current quarter. (Example: 032 are for Fiscal Year 2003, Quarter 2).

Make sure that the Total Delivery Value field has leading zeros entered before the value.

After you have finished entering data on the screen, click on the ADD A RECORD button, to add the record to the Delivery table.

When you have finished adding all your transactions, click on the WRITE DELIVERY TRANSACTIONS TO NETWORK button. A file will be created on the network for retrieval by the 1000 System Project Officer to update the 1000 System. An email message will be sent to the Project Officer that a file has been created for retrieval.

APPENDIX 9
Note: The FLOW of Funds: DSCA promulgate the PD to the Services
- The Services transfers the funds to DSCA/DBC
- DSCA/DBC MIPRs the funds to DSCA/CFM
- DSCA/CFM accepts the MIPR and then transmits the MIPR to DFAS-Denver
- DFAS-Denver draws the funds into an S9 holding account for that drawdown
- When the S9 case is implemented, DFAS-Denver places the funds in the LOA
- DFAS-Denver reports the expenditures of funds to DSCA BUSOPS-COMPT
