Transmittal No. 22-39

## **Belgium – F-16 Sustainment**

WASHINGTON, July 19, 2022 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Belgium of F-16 Sustainment and related equipment for an estimated cost of \$127 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Belgium has requested to buy additional F-16 sustainment support that will be added to a previously implemented case. The original FMS case, valued at \$98.4 million, included F-16 sustainment, consisting of AN/ARC-210 radios; classified software, Computer Program Identification Numbers (CPINs), and software integration support; Electronic Warfare (EW) database support; test support and equipment; aircraft and munitions support and support equipment; flight simulator support; additional hardware and software delivery and support; spare and repair parts, consumables and accessories; maintenance and maintenance support; mission planning system sustainment; facilities, utilities, and information technology support at U.S. Air Force bases; classified and unclassified publications and technical documentation; and U.S. Government and contractor engineering, technical and logistics support services, studies and surveys; and other related elements of logistical and program support. This notification will include more of the same items and services. The estimated total cost is \$127 million.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a NATO ally which is an important force for political stability and economic progress in Europe.

The proposed sale will improve Belgium's capability to meet current and future threats by maintaining its F-16 fleet in combat-ready status and providing rotational forces to NATO's Eastern flank. Belgium will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin, Bethesda, MD. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Belgium.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law. The description and dollar value is for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, [pm-cpa@state.gov](mailto:pm-cpa@state.gov).
