Transmittal No. 24-88

Denmark – AIM-120D-3 Advanced Medium Range Air-to-Air Missiles

WASHINGTON, October 29, 2024 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Denmark of AIM-120D-3 Advanced Medium Range Air-to-Air Missiles and related elements of logistics and program support for an estimated cost of \$744 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Denmark has requested to buy up to two hundred three (203) AIM-120D-3 Advanced Medium Range Air-to-Air Missiles (AMRAAM); and up to nine (9) AIM-120D-3 AMRAAM guidance sections to include precise position provided by either Selective Availability Anti-Spoofing Module or M-Code. The following non-MDE items will also be included: spare AMRAAM control sections; missile containers and support equipment; munitions support and support equipment; spare parts, consumables and accessories, and repair and return support; weapons software and support equipment; classified software delivery and support; classified publications and technical documentation; transportation support; studies and surveys; U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$744 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Denmark's capability to meet current and future threats by increasing its combat capability. Denmark will use these munitions to defend NATO Allies and its partners. Denmark already has AMRAAM in its inventory and will have no difficulty absorbing these articles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Tucson, AZ. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Denmark.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military-Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
