and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$1.95 billion.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a NATO Ally, which is an important partner for political stability and economic progress in Europe.

The proposed sale will replace Greece's current multi-role helicopter fleet with a more reliable and proven system that will allow Greece to maintain the appropriate level of readiness to conduct combined operations. The UH-60M Black Hawk helicopter will improve the Hellenic Army's ability to deploy combat power to secure Greece's borders, deter actions against its interests, and, when required, respond with credible force. Greece will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Sikorsky, a Lockheed Martin Company, Stratford, CT. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require approximately fifteen (15) U.S. Government and/or fifteen (15) contractor representatives to travel to Greece for an extended period for equipment de-processing/fielding, system checkout, training, and technical and logistics support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
