Transmittal No. 25-04

**Taipei Economic and Cultural Representative Office in the United States –  
Command, Control, Communications, and Computers Modernization**

WASHINGTON, December 20, 2024 - The State Department has made a determination approving a possible Foreign Military Sale to the Taipei Economic and Cultural Representative Office in the United States of Command, Control, Communications, and Computers Modernization and related equipment for an estimated cost of \$265 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Taipei Economic and Cultural Representative Office in the United States (TECRO) has requested to buy three hundred nine (309) Multifunctional Information Distribution System Joint Tactical Radio Systems (MIDS JTRS) Variant 5 (V5). The following non-MDE items will also be included: non-recurring engineering; testing, certification, and other activities necessary to integrate the MIDS JTRS V5 Block Upgrade Three on the recipient's Patriot, HE-2K, P-3, and F-16 Block 20 platforms; communications equipment and services needed to accelerate the modernization of the recipient's Advanced Tactical Datalink System; and other related elements of logistics and program support. The estimated total cost is \$265 million.

This proposed sale is consistent with U.S. law and policy as expressed in Public Law 96-8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and to maintain a credible defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, and economic progress in the region.

The proposed sale will improve the recipient's ability to meet current and future threats by enhancing communications and network security for its command, control, communications, and computers (C4) capabilities. The support will enhance the recipient's ability to command and control its forces by accelerating the delivery of infrastructure for the secure flow of tactical information. The recipient will have no difficulty absorbing this equipment and these services.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor(s) will be selected through competitive procurements conducted by the U.S. Government in accordance with the Federal Acquisition Regulation. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of five U.S. Government personnel and five contractor representatives to visit the recipient for a duration of up to four weeks to provide engineering and technical support services, as well as program and technical reviews.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military-Affairs, Office of Congressional and Public Affairs, [pm-cpa@state.gov](mailto:pm-cpa@state.gov).
