Transmittal No. 19-06

Bahrain – Patriot Missile System and Related Support and Equipment

WASHINGTON, May 3, 2019 - The State Department has made a determination approving a possible Foreign Military Sale to Bahrain of various Patriot missile systems and related support and equipment for an estimated cost of \$2.478 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Bahrain has requested to buy sixty (60) Patriot Advanced Capability-3 (PAC-3) Missile Segment Enhancement (MSE) missiles, thirty-six (36) Patriot MIM-104E Guidance Enhanced Missiles (GEM-T) missiles with canisters, nine (9) M903 Launching Stations (LS), five (5) Antenna Mast Groups (AMG), three (3) Electrical Power Plants (EPP) III, two (2) AN/MPQ-65 Radar Sets (RS), and two (2) AN/MSQ-132 Engagement Control Stations (ECS). Also included is communications equipment, tools and test equipment, range and test programs, support equipment, prime movers, generators, publications and technical documentation, training equipment, spare and repair parts, personnel training, Technical Assistance Field Team (TAFT), U.S. Government and contractor technical, engineering, and logistics support services, Systems Integration and Checkout (SICO), field office support, and other related elements of logistics and program support. The estimated cost is \$2.478 billion.

This proposed sale will support the foreign policy and national security of the United States by improving the security of a Major Non-NATO ally which is a force for political stability and economic progress in the Middle East. This sale is consistent with U.S. initiatives to provide key allies in the region with modern systems that will enhance interoperability with U.S. forces and increase security.

The proposed sale will enhance Bahrain's interoperability with the United States. Bahrain will use Patriot to improve its missile defense capability, defend its territorial integrity, and deter regional threats. Bahrain will have no difficulty absorbing this system into its armed forces.

The proposed sale of these missiles will not alter the basic military balance in the region.

The prime contractor for the PAC-3 Missile is Lockheed-Martin in Dallas, Texas. The prime contractor for the GEM-T missile is Raytheon Company in Andover, Massachusetts. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require approximately 25 U.S. Government and 40 contractor representatives to travel to Bahrain for an extended period for equipment de-processing/fielding, system checkout, training, and technical and logistics support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
