Transmittal No. 15-78

Lithuania - M 1126 Stryker Infantry Carrier Vehicles (ICV) with 30mm cannon and M2 Machine Guns, and Related Support Equipment

WASHINGTON, Nov 5, 2015 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Lithuania for Stryker Infantry Carrier Vehicles and associated equipment, parts and logistical support for an estimated cost of \$599 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale on November 4, 2015.

The Government of Lithuania has requested a sale of eighty-four (84) M 1126 Stryker Infantry Carrier Vehicles (ICV) with the ATK 30mm cannon, the XM813 30mm cannon or a European variant with the Remote Weapon Station and eighty-four (84) M2 Flex Machine Guns. Additionally, they have requested the ICV-30 package, including contractor logistics support, support equipment, spare parts, armaments, two (2) AN/PRC-152 Radios per vehicle, one (1) AN/PSN-13 DAGR per vehicle, one (1) VIC-3 per vehicle, training aids/devices/simulators & simulations (TADSS), translated technical manuals with laptop computers, training, Foreign Service Representatives (FSRs), OCONUS Contractor vehicle deprocessing services and technical assistance. The total estimated value of MDE is \$462 million. The overall total estimated value is \$599 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally.

Lithuania's acquisition of the Stryker ICV system would represent a major advancement in capability for the Lithuanian Land Forces, filling a vital capability gap that is not currently addressed. The Stryker ICV system would provide maneuverability, speed, and firepower to the Lithuanian Land Forces and enhance Lithuania's ability to contribute to territorial defense and NATO and coalition operations. Lithuania will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor is unknown at this time. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require up to 30 U.S. Government or contractor representatives to travel to Lithuania. It is estimated that it will take up to 30 personnel to execute the managing, fielding, training, initial establishment of spare storage and maintenance facilities, and the execution of maintenance over a two-year period, beginning with the first fielding of vehicles.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
