Transmittal No. 13-03

Singapore – AIM-120C7 AMRAAM and Related Support

WASHINGTON, April 4, 2013 – The Defense Security Cooperation Agency notified Congress April 3 of a possible Foreign Military Sale to the Government of the Republic of Singapore for 100 AIM-120C7 Advanced Medium Range Air-to-Air Missiles (AMRAAM) and associated equipment, parts, training and logistical support for an estimated cost of \$210 million.

The Government of Singapore has requested a possible sale of 100 AIM-120C7 Advanced Medium Range Air-to-Air Missiles (AMRAAM), AMRAAM Programmable Advanced System Interface Simulator (PASIS), 10 AMRAAM Spare Guidance Sections, 18 AN/AVS-9(V) Night Vision Goggles, H-764G with GEM V Selective Availability Anti-Spoofing Module (SAASM), Common Munitions Built-in-Test Reprogramming Equipment (CMBRE-Plus) in support of a Direct Commercial Sale of new F-15SG aircraft. Also included: containers, spare and repair parts, support equipment, tools and test equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering, logistics, and technical support services, and other related elements of logistics and program support. The estimated cost is \$210 million.

This proposed sale will contribute to the foreign policy and national security of the United States by increasing the ability of the Republic of Singapore to contribute to regional security. Its contributions to counter-piracy and counterterrorism efforts continue to stabilize a critical chokepoint where much of the world's goods and services transit en route to and from the Asia Pacific region. The proposed sale will improve the security of a strategic partner which has been, and continues to be, an important force for political stability and economic progress in the Asia Pacific region. Specifically, this proposed sale will improve the Republic of Singapore Air Force's (RSAF) air to air capability and ability to defend its nation and cooperate with allied air forces

The Republic of Singapore requires these missiles to meet current and future threats of enemy aircraft. Singapore is procuring, via Direct Commercial Sale, new F-15SG aircraft. The proposed sale will enhance RSAF's ability to operate with coalition forces in bilateral and multilateral exercises and potential air defense operations. Singapore will use these capabilities as a deterrent to regional threats and to strengthen its homeland defense. Singapore will have no difficulty absorbing the AIM-120C7s into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Raytheon Missile Systems in Tucson, Arizona; Honeywell Aerospace in Phoenix, Arizona; ITT Night Vision in Roanoke, Virginia; and ATK Defense Electronic Systems in Clearwater, Florida. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Singapore.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.
