Transmittal No. 14-01

Turkey – Joint Direct Attack Munitions (Corrected*)

WASHINGTON, Dec. 7, 2015 - The State Department has made a determination approving a possible Foreign Military Sale to Turkey for Joint Direct Attack Munitions and associated equipment, parts and logistical support for an estimated cost of \$70 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale on Dec 2, 2015. This certification was previously delivered to Congress on Oct 28, 2015 but it erroneously identified the principal contractor. The new certification corrects this discrepancy and makes no other changes.

The Government of Turkey has requested a possible sale of Joint Direct Attack Munition (JDAM) tail kits comprised of 400 GBU-31(V)1 for use with Mk84 bombs, 200 GBU-31(V)3 for use with BLU-109 bombs, 300 GBU-38 for use with Mk82 bombs, 100 GBU-54 Laser JDAM kits for use with Mk82 bombs, 200 BLU-109 Hard Target Penetrator Warheads, and 1000 FMU-152A/B fuzes. Non-MDE includes containers, support equipment, spare and repair parts, integration, test equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering and technical support, and other related elements of logistics support. The estimated cost is \$70 million.

Turkey is a partner of the United States in ensuring peace and stability in the region. It is vital to the U.S. national interest to assist our NATO ally in developing and maintaining a strong and ready self-defense capability. This proposed sale is consistent with those objectives.

This sale will enhance the Turkish Air Force's ability to defend and provides a capability to contribute to future NATO operations. The proven reliability and compatibility of like-systems will foster increased interoperability between NATO and U.S. forces, and expand regional defenses to counter common threats to air, border, and shipping assets in the region. Turkey will have no difficulty absorbing these additional munitions into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be the Boeing Company of St. Charles, Missouri. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

The number of U.S. government and contractor representatives to support this program will be determined during negotiations with the Government of Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.

*This proposed sale notification was previously posted on 30 October 2015. This version corrects an error in the identification of the principal contractor.
