Transmittal No. 17-21

**Government of the United Arab Emirates (UAE) – Patriot PAC-3 and GEM-T
Missiles**

WASHINGTON, May 11, 2017 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of the United Arab Emirates (UAE) for Patriot PAC-3 and GEM-T missiles. The estimated cost is \$2 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale on May 10, 2017.

The Government of the United Arab Emirates has requested the possible sale of sixty (60) Patriot Advanced Capability 3 (PAC-3) missiles with canisters and one hundred (100) Patriot Guidance Enhanced Missile-Tactical (GEM-T) missiles. Also included are canisters, tools and test equipment, support equipment, publications and technical documentation, spare and repair parts, U.S. Government and contractor technical, engineering and logistics support services, and other related elements of logistics and program support. The estimated cost is \$2 billion.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the security of an important ally which has been, and continues to be, a force for political stability and economic progress in the Middle East. This sale is consistent with U.S. initiatives to provide key allies in the region with modern systems that will enhance interoperability with U.S. forces and increase security.

The proposed sale will enhance the UAE's capability to meet current and future aircraft and missile threats. The UAE will use the capability as a deterrent to regional threats and to strengthen its homeland defense. The UAE has fielded the Patriot system since 2009 and will have no difficulty absorbing these additional missiles into its armed forces.

The proposed sale of these missiles will not alter the basic military balance in the region.

The prime contractor for the PAC-3 Missile is Lockheed-Martin in Dallas, Texas. The prime contractor for the GEM-T missile is Raytheon Company in Andover, Massachusetts. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require additional contractor representatives to the UAE. It is not expected additional U.S. Government personnel will be required in country for an extended period of time. U.S. Army Aviation and Missile Life Cycle Management Command (AMCOM) currently maintains a field office in UAE in support of UAE Patriot systems.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
