Transmittal No. 16-53

United Kingdom – Certifiable Predator B Remotely Piloted Aircraft

WASHINGTON, Nov. 16, 2016 - The State Department has made a determination approving a possible Foreign Military Sale to the United Kingdom for Certifiable Predator B Remotely Piloted Aircraft, equipment, training, and support. The estimated cost is \$1.0 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale on November 16, 2016.

The United Kingdom (UK) requested a possible sale of up to twenty-six (26) Certifiable Predator B Remotely Piloted Aircraft (16 with option for additional 10); twelve (12) Advanced Ground Control Stations (GCSs) (8 with option for additional 4); four (4) New Launch and Recovery Element GCSs; four (4) Upgrades to existing Blk 15 Launch and Recovery Element GCSs (2 with option for additional 2); twenty-five (25) Multi-spectral Targeting Systems (12 + 2 spares, with option for additional 10 + 1 spare); twenty-five (25) AN/APY-8 Lynx Iie Block 20A Synthetic Aperture Radar and Ground Moving Target Indicators (SAR/GMTI) (12+ 2 spares, with option for additional 10 + 1 spare); Eighty-six (86) Embedded Global Positioning System/Inertial Guidance Units (EGIs) (3 per aircraft) (48 + 5 spares, with option for additional 30 + 3 spares). This sale also includes communications equipment, Identification Friend or Foe (IFF) equipment; weapons installation kits; TPE331-10YGD engines; unique and common spares package; support equipment; U.S. Air Force technical orders; country specific technical orders; Contractor Logistics Support for two (optional three) years; contractor provided aircraft components, spares, and accessories; personnel training; and other related elements of logistical and program support. The total estimated program cost is \$1.0 billion.

The UK is a close ally and an important partner on critical foreign policy and defense issues. The proposed sale will enhance U.S. foreign policy and national security objectives by enhancing the UK's capabilities to provide national defense and contribute to NATO and coalition operations.

This sale will improve the UK's ability to meet current and future threats by providing improved Intelligence, Surveillance and Reconnaissance (ISR) coverage that enhances homeland security, promotes increased battlefield situational awareness, augments combat search and rescue, and provides ground troop support. The Certifiable Predator B will also be used to support the UK's armed forces and coalition forces engaged in current and future peacekeeping, peace-enforcing, counter-insurgent, and counterterrorism operations. The UK already operates armed remotely piloted aircraft, the MQ-9 Reaper, and will have no difficulty transitioning to the Certifiable Predator B.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be General Atomics Aeronautical Systems, Inc. in San Diego, California. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or

contractor representatives to the UK.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
